My mother did the first terrible thing for which I never forgave her, y'know... my mother... she says to me, "Henry, I have a wart." I'm only four years old and I'm sitting in this little chair and she says, "Henry, what shall I do with this?" And I say, "Cut it off. With a scissors." Two days later she got blood poisoning and she says, "And you told me to cut it off!" and bang bang bang she slaps me, for telling her to do this. How do you like a mother who'd do that?

One Saturday night I come home pretty well filled up with liquor, and I was mighty cold. Sally and all the children had gone to bed, and the house was dark. I saw a few coals in the fireplace, and got down on my knees to blow em into a flame. I blowed and blowed, but nothing happened. Then I seen I was just blowin at a patch of moonlight that came through the window and fell on the ashes. I got up and tried to go to bed, but the bed was going round and round, and I couldn't catch up with it. So I just stood by the door and waited for it to come around to me. Every time the bed would come around I'd make a jump for it, and every time I jumped I'd hit the floor, ker-plunk. Sally woke up and got me onto the bed and took off my shoes and covered me up. This oughta broke me from drinking, but it didn't.

Iters encouraged students to bring in any material they found, and on at least one occasion (this was later, in the mid-forties) he himself tested the "solutions." Several students hostile to Albers, and impatient of what they took to be the endless mechanics of the course, decided to do a three-dimensional construction out of a material not singular to Black Mountain but found there in plentiful supply: cow dung. That day in class, as always, the constructions were placed in front of the room, without names attached to them. Albers—again, as always—picked up each piece in turn, examining and criticizing it. "Ah (as he passed down the row), a good swindle: marbles made to look like fish eggs... and what's this one? Wonderful—it looks exactly like muddy cow (t--d)! So real you want to pick it up and smell to be sure..."—at which point he did; and was sure. But he never batted an eye. He simply put the (t--d) back down, omitted his usual comment on the "material's" color and form, and blandly proceeded on to the next construction.

Martin Duberman, Black Mountain: An Exploration in Community (New York: E.P. Dutton, 1972), pp. 68-69 (which features a lengthy description of the teaching practices of the Bauhaus painter Josef Albers, during the years that he taught at Black Mountain College in the North Carolina foothills).
The Chicago press had gotten hold of Moholy and his New Bauhaus with single-minded curiosity, and so did every club and civic association in town. Being highly appreciative of beautiful women, he accepted easily in his Chicago days an invitation by a Fashion Group to attend a luncheon in his honor at the Drake Hotel. Hardly had the ice cream been served when Moholy got up, unfolded a thick manuscript that had gone over well at Harvard, and started to read with intensity and concentration, ignoring staggering language difficulties in his zeal to win new converts. As time went by one after another of the fashion ladies took an unobtrusive leave until only three club-leaders and a drowsy waiter were left. When I later tried to point out the incompatibility of lecture and audience, Moholy was annoyed: "I don't know what you are talking about," he said. "Five people stayed because they got something out of it."

"Three," I said.

"Five," said Moholy. "Why do you assume that neither you nor the waiter have anything to learn?"

In one of the productions of the Marx Brothers, someone exclaimed "Eureka!," to which Chico Marx replied, "You dough-nah smell-ah so good yourself."

Nolde did not use paintbrushes. When inspiration seized him, he threw away his brushes and simply dipped his old paint-rag into the colors and brushed it all over the canvas in blissful delirium. His pictures were formless, primitive, motley-colored daubings with complete neglect of craftsmanship. Nolde was an Expressionist and belonged to a group of such artists. The expression of one's inner self was all that mattered. If viewed from the high level of technical tradition, or if compared with Rembrandt or Raphael, this type of painting was nothing but brutal daubs of color. Nolde's name was one of the novel methods of frightening children at that time. When they were bad, they were threatened: "Look, I'm going to tell Nolde. He will pick you up and smear you all over his canvas."

Cassirer was rector of the University of Hamburg during the academic year 1929/30... There was a close relationship between the departments of psychology and philosophy at Hamburg. So, when Cassirer became rector, the two joined forces to celebrate the occasion at one of the big dance halls in Hamburg. The assistants had prepared a number of skits as part of the festivities. I played Pavlov's dog in one of them. I remember that Cassirer said that my bark was very convincing—he even thought that he could detect a Russian accent.

I'm a dog. I yawn, the tears roll down my cheeks. I feel them. I'm a tree, the wind gets caught in my branches and shakes them vaguely. I'm a fly, I climb up a windowpane, I fall, I start climbing again. Now and then, I feel the caress of time as it goes by. At other times—most often—I feel it standing still. Trembling minutes drop me down, engulf me, and are a long time dying. Wallowing, but still alive, they're swept away. They are replaced by others which are fresher but equally futile. This disgust is called happiness. My mother keeps telling me that I'm the happiest of little boys. How could I not believe it since it's true? I never think about my forlornness. To begin with, there's no word for it. And secondly, I don't see it. I always have people around me. Their presence is the warp and woof of my life, the stuff of my pleasures, the flesh of my thoughts.

Above is reproduced a stamp issued by the Swedish government in 1981. It is one of a group of commemorative stamps which celebrate Swedish film history.

When a man has reached old age and has fulfilled his mission, he has a right to confront the idea of death in peace. He has no need of other men, he knows them already and has seen enough of them. What he needs is peace. It is not seemly to seek out such a man, plague him with chatter, and make him suffer banalities. One should pass by the door of his house as if no one lived there.

I had a dime and a nickel in my pocket. With the dime, the tenth part of a dollar, I bought a ticket. I went in and heard the ventriloquist and his dummy: "Will you spell a word for me, Danny?" "I'll try, what's the word?" "Constantinople." "Why do you tell me you can't stand on an apple?"

Robert Williams Wood was a professor of physics at Johns Hopkins University who was known for his work in optics and spectroscopy. In 1917 he published an illustrated children's book in which normally separate classes of things (for example, the cow and the cowry) are made to look and sound alike. Reproduced here (at right) is a page from the book.

Never play cards with any man named "Doc". Never eat at any place called "Mom's". And never, ever, no matter what else you do in your whole life, never sleep with anyone whose troubles are worse than your own.

Nelson Algren.

A question that could be addressed to Duchamp: Who was that Lydie we saw outwit you last issue?

Suggested by Flossie M. Jetsam, a reader from Norfolk, Virginia.

During one of our daily talks, my grandmother told me that my grandfather had told her he had seen a child coming to him with a bunch of flowers. He is, of course, she said, already in the next world—which news I accepted almost as a matter of fact; she had spoken often of the journey to the next world my grandfather was about to take. I was not shocked. My grandmother was not grieving. She spoke as though my grandfather had just moved into a beautiful sunlit room. Several days later (so I have always maintained in telling the story), when I came home from kindergarten (which was across the street), my mother said quietly, "Your grandfather is in the next world." "Yes, I know he is," I said with matter-of-factness. "Grandmother has already told me." "But she couldn't have," my mother exclaimed, "it only happened this morning while you were at school."

The secret of teaching is to appear to have known all your life what you learned this afternoon.

The secret of teaching is to appear to have learned this afternoon what you have known all your life.
Robert Motherwell wrote that Josef Albers told how Kurt Schwitters used to tell a hilarious story about a parrot with a hernia, but Albers couldn’t remember how the story went.

M. Kasper, "The Transmission of Dada" in All Cotton Briefs: Illustrated Short Prose (Cedar Falls, Iowa: North American Review, 1984). This is an uncommonly curious book which readers of BALLAST will certainly like. It is both written and visual throughout, as shown here in one of its pages (at right). To order a copy directly, send $3.95 postpaid to: The North American Review, University of Northern Iowa, Cedar Falls, Iowa 50614.

Why do I like puns? In part it is a form of intellectual snobbery because it shows an ability to think laterally; in part it is companionable in that if you understand a pun or one of yours is understood, it implies a rapport.

Sometimes men come by the name of genius in the same way that certain insects come by the name of centipede—not because they have a hundred feet, but because most people can’t count above fourteen.

Georg Christoph Lichtenberg.
Virtually all that we know of this man, there are very few artists whose work is as fine. "I think that the artist has a special knowledge, and I am not sure that it can be shared with everyone. There are very few people who really need to look at art. When art becomes too accessible, it loses what I call its power--its capacity to inspire awe." Based on the little we know, it can be shared with everyone. There are very few people who really need to look at art. When art becomes too accessible, it loses what I call its power--its capacity to inspire awe. Based on the little we know of this man, there are very few artists whose work is as fine.

The second issue of BALLAST is dedicated to the work of Jules Kirschenbaum, a contemporary American painter, who is a professor of painting at Drake University in Des Moines, Iowa. He was born fifty-five years ago in New York, and studied at the Brooklyn Museum Art School. He is associated with the Forum Gallery in New York. Among those who own his works are the National Academy of Design, Des Moines Art Center, Whitney Museum of American Art, Butler Institute of American Art (Youngstown, Ohio), and Everhardt Museum (Scranton, Pennsylvania). Other details of his life can be found in Who's Who in America (vol. 23, no 4, 15 June 1984). In the article, five of Jules Kirschenbaum's paintings are shown in good quality color reproductions. We were especially taken by Kabbahah (1982, National Academy of Design), Dream of a Gem (1980-81), and Cornelis (1983). "I don't think my paintings have a very wide audience," Kirschenbaum remarks in the article, "I think that the artist has a special knowledge, and I am not sure that it can be shared with everyone. There are very few people who really need to look at art. When art becomes too accessible, it loses what I call its holy power--its capacity to inspire awe." Based on the little we know of this man, there are very few artists whose work is as fine.

The pearl is the oyster's autobiography.

Federico Fallini.

I remember one evening I arrived at Braque's studio. He was working on a large oval still life with a package of tobacco, a pipe, and all the usual paraphernalia of Cubism. I looked at it, drew back and said, "My poor friend, this is dreadful. I see a squirrel in your canvas." Braque said, "That's not possible." I said, "Yes, I know, it's a paranoiac vision, but it so happens that I see a squirrel. That canvas is made to be a painting, not an optical illusion. Since people need to see something in it, you want them to see a package of tobacco, a pipe, and the other things you're putting in. But for God's sake get rid of that squirrel." Braque stepped back a few feet and looked carefully and sure enough, he saw the squirrel, because that kind of paranoiac vision is extremely communicable. Day after day Braque fought that squirrel. He changed the structure, the light, the composition, but the squirrel always came back, because once it was in our minds it was almost impossible to get it out. However different the forms became, the squirrel somehow always managed to return. Finally, after eight or ten days, Braque was able to turn the trick and the canvas again became a package of tobacco, a pipe, a deck of cards, and above all a Cubist painting.

Wednesday June 26th 1805. The Mosquitos are extremely troublesome to us.

Friday July 12th 1805. Mosquitos extremely troublesome to me today nor is a large knot less troublesome which does not sting, but attacks the eye in swarms and compels us to brush them off or have our eyes filled with them.

July 14th Sunday 1805. A fine morning calm and warm. Mosquitos & Knacs very troublesome.

Circus manager to a human cannonball who had threatened to resign: "You cannot quit! Where will I ever be able to find a person of your caliber?"

Having the critics praise you is like having the hangman say you've got a pretty neck.

Eli Wallach.

The pearl is the oyster's autobiography.

Federico Fallini.

In the rest of our walk, too, Bohr and I amused ourselves by flinging stones at distant objects. On one occasion this activity gave rise to a conversation about the powers of the imagination. I happened to see a telegraph pole quite a long distance away, almost too far to be reached with a stone. When the improbable nevertheless happened, and I hit it on my first attempt, Bohr became reflective: "If you had thought first about your aim, or about the correct angle of our arm and wrist, you wouldn't have had the least chance of scoring a hit. But since you were unreasonable enough to imagine that you could hit the target without special effort, why, you did it." We then had a lengthy discussion about the roles of images and concepts in atomic physics.

People who see a drawing in the New Yorker will think automatically that it's funny because it is a cartoon. If they see it in a museum, they think it is artistic; and if they find it in a fortune cookie, they think it is a prediction.

Saul Steinberg.

Driven by insatiable curiosity about these newcomers to the land where they had hunted, an occasional group of Assiniboin would pay their visit. In the daytime they sat silently on their horses and watched us as we went about the chores. At night they studied us from the darkness, little concerned whether they were detected, and obviously concluding that if the white man insisted on windows in his lodge he must expect the passer-by to look inside. The Indians did us no harm. They only baffled us with their stoicism and imperturbable countenances.

Once I gave a crazy old beggar lady some coins. She put them in her mouth. I had no food on me so I gave her my Chiclets. She took them out of the box and put the box in her mouth.

At a local auction, he bought an antique writing desk. When he got home, he opened it up, and a dozen people fell out. Apparently it was a missing persons bureau.

Every day, Sancho," said Don Quixote, "you are becoming less foolish and more sensible." "It must be that some of your worship's good sense is rubbing off on me," Sancho replied. "Lands which by themselves are dry and barren, if they are manured and cultivated, bring forth good fruit. I mean to say that your worship's conversation is the manure that has been spread upon the barren ground of my dry wit; the time that I have spent in your service and company has been the cultivation..."

What is sauce for the goose may be sauce for the gander but it is not necessarily sauce for the chicken, the duck, the turkey, or the guinea hen.

Alice B. Toklas.

My assistant, Isadore Grossman, one day came to me in a fury, saying that the teacher had been talking about modern sculpture and a girl had asked him what he thought of the sculpture of Lipchitz. The teacher had had a lump of clay in his hands and had let it fall on the floor, where it splattered, saying that that was a Lipchitz. I only said, "That is a rather interesting idea. I think I might try to make some such sculptures."

Peter Ustinov (remembering his childhood in Europe), Dear Me (Middlesex, p. 202).

A Norwegian told me his mother sent him to a store to get something and he came home saying he forgot what she sent him for. She sent him again with the words, "What you don't keep in your head your feet must make up for, my little man." When he ate with his fingers and his grandmother told him to eat with his fork, he said, "Fingers were made before forks," and she cornered him, "But not your fingers."

I do recollect having to go to the toilet at the house of Herr Heller, who had a reputation for stinginess. This was confirmed when I discovered that the toilet paper was composed of quartered sheets of typing paper with holes in one corner, through which a piece of string attached them to a nail arbitrarily driven into the bathroom wall. These pieces of paper were covered in messages printed in violet ink, many of them marked "Secret" and some of them "Most Secret". How much simpler a method of disposal than all the latterday complications thought up by those involved in the activities of C.I.A. and F.B.I.!

or could I sing "The Birmingham Jail" at Granny Fant's. In December 1941, Moholy was appointed to the Mayor's personal staff in charge of camouflage activities in the Chicago area. During blizzards and rainstorms, in fog and in brilliant sunlight, he had to take flights to absorb air views of the city under diverse weather conditions. While he fought air sickness, which he never overcame completely, he pondered how to conceal the vastness of Lake Michigan with a simulated shore line and floating islands.
