Chinese Strategic Asset Seeking in the United States

By: Justin Niday, Senior at University of Northern Iowa (UNI)

How does the measurement of Chinese strategic-asset-seeking foreign direct investment impact econometric location choice models in the United States?

Background

Strategic Asset Seeking (SAS):

- Investing in search of technology and skill related intangible resources
- Examples:
 - Knowledge
 - Technology

Independent Variables Measuring SAS:

- Number of Patents
- Number High Tech Exports
- Enrollment in Post-Secondary School
- Research and Development expenditure
- Research and Development per Capita

Dependent Variables Measuring FDI

Results

Significant Count Results:

- Patents (-)
- R&D (-)

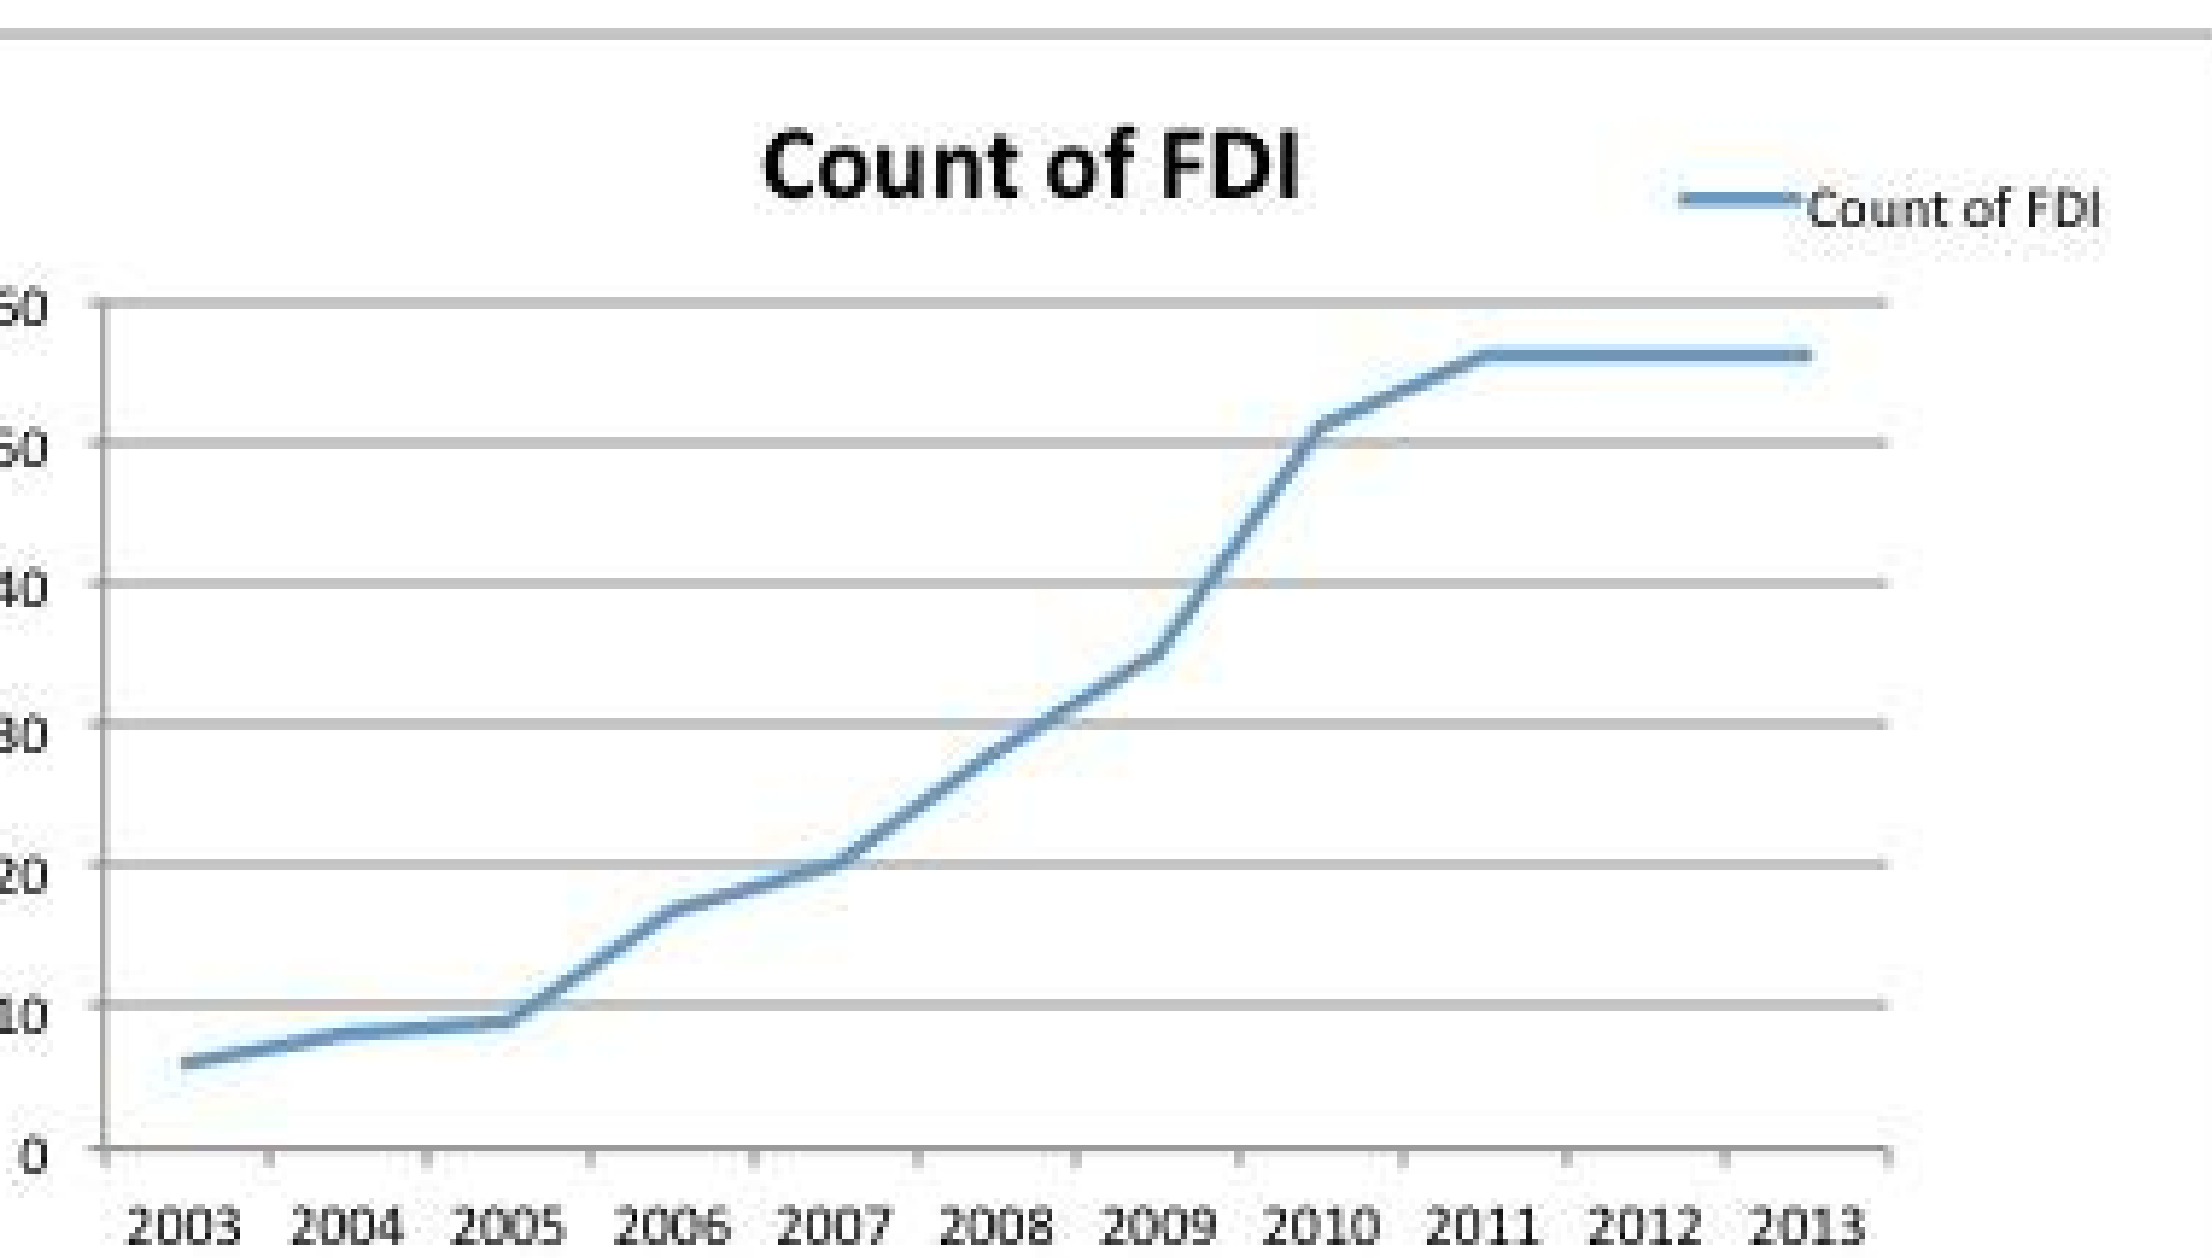

Significant Value Results:

- High Tech Exports (-)
- Patents (-)
- Education (-)
- R&D Expenditure (-)

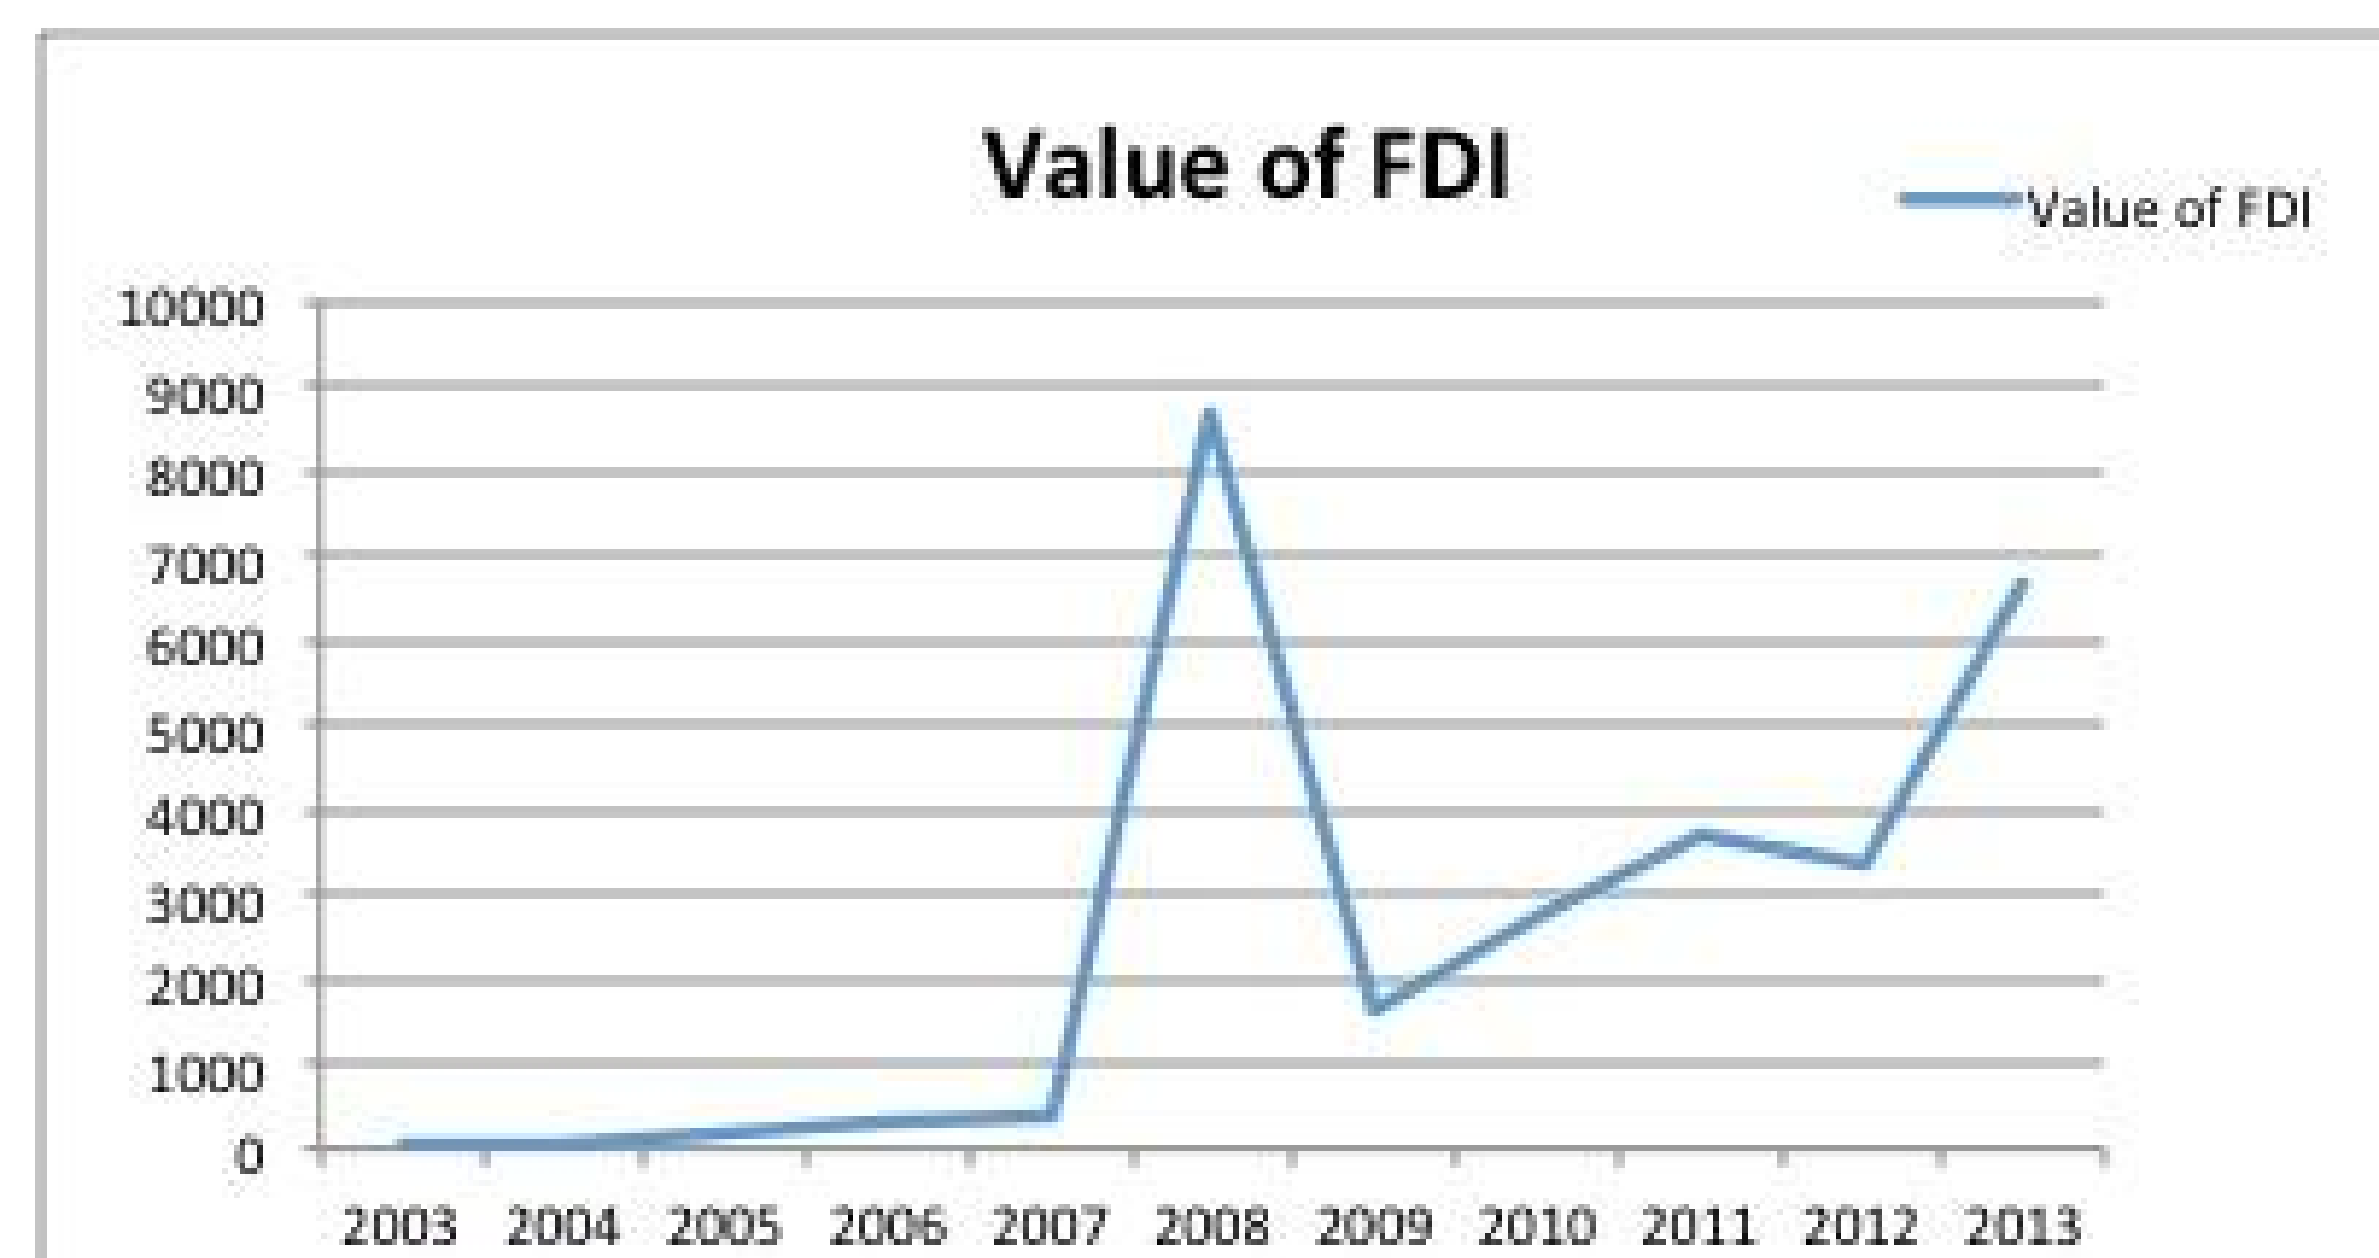

SAS Negatively Correlated to Chinese FDI in US

Two Ways to Measure FDI

Count

Value

Conclusion

- Do not focus on Strategic Assets
- Focus on amount of GDP
- Focus on Wage Rate
