Notes Concerning *Drop the Clothespin*

Level: Beginner (PreK)

Materials: clothespins, containers

Recommended # of players: 1 or more

Relationships: spatial reasoning; aiming; relationship between distance from opening and accuracy; relationship between orientation of clothespin (horizontal or vertical) and ability to fall into container.

Notes:

This familiar game was probably played by an older generation with common household items: milk bottles (from when milk was delivered to the door in glass bottles) and clothespins (from when laundry was routinely hung outside to dry). Any bottle or can will do if it has an opening that is wide enough to accommodate a clothespin but narrow enough (generally, narrower than the length of the pin) to be challenging.

This very easy game does not even require turn-taking. Although children *can* take turns dropping their clothespins, they do not have to. The game can be played with everyone dropping their clothespins at the same time.

Children have the opportunity to reason about what they need to do to get their pins in the containers. Most children figure out quickly that the closer they are to the opening, the easier it is to get the pin into the container. Soon, they lean over so far that they are inches from the opening. When this happens, the teacher can introduce the rule that children must stand up straight. Most children also figure out quickly that they must hold the pin so that it drops vertically; when they hold the pin horizontally, it does not pass through the opening.

This game can also be played as a solitary activity.

Drop the Clothespin

(1 or more players)

Materials: clothespins, containers

Objective: To drop your clothespins into your container

To Play:

1. Each player gets 5 clothespins and a container.
2. Players put their containers on the floor or ground in front of them.
3. Players stand up straight, hold a clothespin in front of their nose, and drop it into the container.
4. Play continues until players drop all of their clothespins one time.
5. The player with the most clothespins in his or her container wins.
