What You Need to Know About Regulatory Recordkeeping

Every business knows that along with regulations, come recordkeeping. And environmental regulations are no exception. If your business gets audited, one of the first items likely covered is a request to look at your records. So, what do you need to know about regulatory recordkeeping?

From an environmental and regulatory standpoint, we know there is a lot of information you have to keep on hand. But how much and for how long? Here we break down two of the most prevalent regulations recordkeeping that our clients are responsible for and must consistently maintain: RCRA (Resource Conservation and Recovery Act) and Clean Air Act (Air Quality Permits). Midwest Food Recovery Summit
September 11 - 13 | Des Moines
Speakers Announced For the Midwest Food Recovery Summit

Last week, we released the first 18 speakers for the 2018 summit. They will cover everything from source reduction and feeding people, recycling, and recovery options, building partnerships and coalitions, and much more. See the full list plus others than have been added this week [here](link).

IWRC Partners with Brewers Association to Host Summer Internship

Rachel Beck has joined the IWRC this summer as a Sustainability Intern. Rachel is a senior Environmental Science student at the University of Northern Iowa. She will be working with Iowa craft breweries who are involved in the Iowa Green Brewery Certification program. [Read More](link).

UNI Graphic Technology Club works with STAR4D Military Painter Training Program

Last month, the Grafx Club at the University of Northern Iowa (UNI) had a chance to tour a facility of one of their clients - the Iowa Waste Reduction Center’s (IWRC) spray painter training and research facility located in the Cedar Falls Industrial Park. [Read More](link).

Tracking Hazardous Waste Shipments E-manifest Workshops

On June 30, 2018, the e-manifest national system for tracking hazardous waste shipments electronically will begin. This system will modernize the nation’s cradle-to-grave hazardous waste tracking process while saving valuable time, resources and dollars for industry and states. PA developed the workshops in cooperation with the Iowa Department of Natural Resources and the other state regulatory agencies in Region 7. Click [here](link) for complete worship locations and dates.
