DNR Shares New Resources for Air Quality Construction Permits

The Iowa Department of Natural Resources has developed new resources to help answer two common construction permitting questions.

- What types of activities can I do prior to issuance of construction permit?
 - A new fact sheet now explains the common activities companies typically want to start before receiving the permit. It can be found under the General Guidance tab in the Construction Permitting portion of the Air Quality Bureau website located at www.iowadnr.gov/airconstructionpermits.
- What happens when my permitted facility has a change in ownership?
 - A new FAQ dives into the process of notifying the Department for Construction Permits and Permits by Rule for Spray Booths. "Change in Facility Ownership Frequently Asked Questions (FAQ)" and can be found under the General Guidance tab in the Construction Permitting portion of the Air Quality Bureau website located at www.iowadnr.gov/airconstructionpermits.

And as always, if you have any air quality questions, give the Iowa Air Emissions Assistance Program a call at 1-800-422-3109.

Prepare for 2017 - Upcoming Deadlines

2016 6X Certification and Compliance Report for 2016

Businesses subject to 6X NESHAP - the report for 2016 will be due **January 31, 2017**. Download the report and get more information on IWRC's 6X webpage. [Learn More](#)

2016 Grain Elevator PTE Report

Group 1 and 2 Grain Elevators are required to calculate PM10 PTE for 2016 by **January 31, 2017**. If you haven't created an account with IWRC's free GrainPTE program to record facility information, calculate the PTE and generate reports. The records and calculations do not need to be submitted to the Iowa DNR but must be kept on site for a period of five years and be made available upon request. Create your free account or log in at grain.iwrc.uni.edu.

DNR SWAP Funding on Hiatus

Due to continued increasing interest and participation in the DNR's Solid Waste Alternatives Program (SWAP), coupled with decreased available funding, the DNR will not currently accept new funding proposal requests. The DNR will continue to evaluate available resources and may consider accepting proposals for projects again in summer 2017. This does not affect any current projects that have been funded.
