Global Feedback Report
UNI ScholarWorks: Institutional Repository at the University of Northern Iowa
July 1, 2016 - June 30, 2020

The repository ties directly to the strategic goals of UNI by illustrating student success. It is one of the few things that clearly demonstrates the value and global reach of all parts of the university.

[UNI ScholarWorks](#) approaches 2 million global downloads! UNI's institutional repository is a significant tool in demonstrating the reach and impact of programs and departments at the University of Northern Iowa. The repository is currently receiving 3,000 downloads per day and 90,000 downloads per month and as the system grows these rates will continue to increase.

A wide variety of content is found in UNI ScholarWorks, ranging from *journals* to *conferences* to *image galleries* to *books developed through course assignments* to *undergraduate honors program theses* to *graduate theses and dissertations*.

The entire university community together is creating an important resource for a global audience. The system metrics provide information about individual works. In addition, we receive feedback from people from all over the world about how specific works have impacted and helped them.

A dissertation, "[A study of college student attitudes and behaviors related to recycling](#)," by a student in the Department of Technology is the most downloaded thesis/dissertation located in the repository with 21,000 global downloads since its posting in 2015 (download number retrieved 4/1/2021).

The global input listed below was collected from responses to a feedback form that is found throughout the repository. The form asks permission so the library can share the submitter's stories. The form also requests the link to the resource the person is commenting on, therefore we can often link feedback to a specific resource within the repository.

Feedback received on 5/21/2020 for an article out of the *Proceedings of the Iowa Academy of Science*.

A federal government scientist states, "The natural history data in this journal is very helpful in understanding the requirements to restore natural resources impacted by oil and hazardous waste spills."

- [Proceedings of the Iowa Academy of Science](#) | 154,066 global downloads (download number retrieved 4/1/2021).

Feedback received on 2/21/2020 for a lesson plan created by the Tallgrass Prairie Center

An elementary school teacher says, “I was thrilled to be able to access such amazing resources as an elementary teacher. I tell my students all the time that our understanding of the world is constantly changing and deepening. I owe it to them to teach science through that lens - what is our best current understanding. Many of the materials I have access to are outdated - thank you for being the exception to the rule! It is only through teaching real science that we can hope our next generation will be ready to make the decisions they'll need to make.”

[Incredible Carbon Journey \(Lesson Plan/Open Educational Resource\)](#), by Tallgrass Prairie Center (2017)

[Lesson Plan, Open Educational Resource | Tallgrass Prairie Center | Department of Biology, College of Arts, Humanities, and Sciences | 370 global downloads since it was posted in October 2017] (download number retrieved 4/2/2021).

Feedback received on 1/16/2020 for a Graduate Student Work, Graduate Research Paper, Division of School Library Studies, Department of Curriculum and Instruction, College of Education

A Spanish student from Universidad de Murcia, states, “I'm working in an investigation about tabletop role-playing games as a didactic tool in high school. This investigation is my Master's thesis and I want to use tabletop RPG games to improve linguistic and literature competence. This paper is one of the arguments to justify my interest in this type of games to teach.”

[Dungeons and Dragons and literacy: The role tabletop role-playing games can play in developing teenagers' literacy skills and reading interests](#), Stefanie L. B. Kaylor (2017)

[Graduate Research Paper | Division of School Library Studies, Department of Curriculum and Instruction, College of Education | Advisor: Karla Krueger | 5,612 global downloads since it was posted in March 2018] (download number retrieved 4/2/2021).

Feedback received on 8/17/2019 for an article out of *Multilingua*, faculty publication, Department of Sociology, Anthropology, and Criminology, College of Social and Behavioral Sciences

A student says, "Thank you so much for providing this article for free! It was super helpful!"

Feedback received on 6/1/2018 - no specific resource identified

A graduate student states, "As a graduate student. I can continue my research and learning experience knowing I have reliable resources at hand!"

Feedback received on 4/15/2018 for an article out of the journal, *American Biology Teacher*

A middle school teacher states, "I was searching wildly online for some kind of interactive lesson that would demonstrate the processes affecting speciation, for use with my online Life Science class for 7th graders. I came across Drs. Countryman and Maroo's "Special Speciation" article that detailed a lesson plan for a college biology course. Although I won't be able to implement the activity exactly as discussed in the article (my online class has, of course, quite a few restrictions with regard to physical materials and space), it was exactly the kind of thing I was looking for. There was even a link to a Google drive for more information and resources."

[Special Speciation](#), by Lyn L. Countryman and Jill D. Maroo (2015)
