MAY, 1959

CEDAR FALLS, IOWA

THE ALUMNUS

Iowa State Teachers College

ON THE COVER—Citizens of the ISTC campus were particularly glad to see the arrival of spring this year, after a bitter winter. No one appreciates spring, a brief glimpse of which is pictured, like lowans, and especially those lowans on the beautiful TC campus.

THE ALUMNUS

IOWA STATE TEACHERS COLLEGE, CEDAR FALLS, IOWA

FOR THE YOUNG-AT-HEART, the bitter 1958-59 winter produced many delightful scenes, like this view of Diagonal walk. All agree, however, that scenes like that on the cover are more than welcome.

MAY

1959

Volume 44

Number 2

THE ALUMNUS is entered as second class matter at the post office in Cedar Falls, Iowa, under the act of August 24, 1912. Authority granted January 27, 1930. It is published and distributed quarterly in September, December, February and May by the Iowa State Teachers College. **The Alumnus** is mailed without charge to 21,500 alumni. As second class matter it is not forwardable without extra cost.

Chuck Morelock Information Services
G. H. Holmes Director of College Relations

The **CAMPUS TODAY**

Carl Rowan Visit

Mr. Carl Rowan, a nationally-honored Negro reporter from the Minneapolis Tribune, took the campus by storm March 16.

Rowan, who has received awards for both best national and foreign news coverage, discussed the three great problems facing mankind today—communism, colonialism, and racism—and the Little Rock situation in afternoon and evening speeches.

After hearing his afternoon talk, students and faculty members filled all the seats in Sabin Auditorium at about 7:45 p.m. that evening. Rowan's speech was scheduled for 8 p.m. The standing-room-only situation was quickly reached—and still the audience filed in. By the time Rowan was ready to talk approximately every square inch in the auditorium was filled, with many sitting on the floor.

Rowan received an ovation when he finished. His visit was sponsored by the Purple Arrow, an honorary scholastic organization for freshman and sophomore women.

Four Freshmen Entertain

One of the nation's best vocal groups—the Four Freshmen—entertained a capacity crowd in the auditorium on April 6.

The Freshmen sang a number of their best-selling hits including "Day by Day," "After You've Gone," "Them There Eyes," "In This Whole Wide World," "Angel Eyes," and "Graduation Day." Since they signed their first contract in 1950, the Freshmen's record sales have numbered in the millions.

Legislature Appropriates \$2,572,250

Substantial Start On Building Program

A substantial start on a building program for present and future needs at Teachers College is now possible as a result of action by the 58th General Assembly.

A total of \$2,572,250 was appropriated for nine items of capital improvement. These include purchase of much needed land for campus expansion, two new buildings, two fairly large additions to the present buildings, and several items of alteration and remodeling.

Plans for the new buildings are now under way. Arrangements are being made to secure architectural services and the college will move ahead with the projects as rapidly as possible. However, construction will not be started for some time, since detailed plans must be completed and approved, bids secured, and contracts awarded before actual construction may be begun.

Although the funds appropriated fell short of the total amount originally requested by over \$1,500,000, the funds made available will enable the college to make a good beginning on long delayed plans for new construction and improvements. The new buildings to be erected are a Health Service Building, \$315,000, and a Music Education Building, \$1,155,000. Other major capital improvement projects which now have the "go" sign are: a sizeable addition to the Arts and Industries Building at \$209,250, acquisition of land for campus expansion, \$200,000, and a new steam generator and new coal handling equipment for the Heating Plant, \$570,000. Special repair, replacement, alteration, and equipment items that were approved include: fire prevention improvements, \$20,000;

Auditorium Building fire escapes and stage remodeling, \$35,000; an addition to the College greenhouse for equipment storage, \$10,000, and modernization of the Auditorium Building heating system, \$58,000.

Recommended new buildings cut from the list of original askings include a proposed new library and equipment, \$1,200,000, an Administration Building and equipment, \$500,000, and a Garage and Receiving depot, \$210,000.

The purchase of land for campus expansion is probably as important an item as any on the approved list. The campus will need to be enlarged as enrollment increases. The need for action on this has been imperative, since residential areas have been growing up close to the campus on all sides. Likewise, as the college has added new dormitories and the wings of the now completed Malcolm Price Laboratory school, it has become imperative that the capacity of the heating plant be increased to meet the added demands for heat and electricity.

The health service has for many years been housed in a wood frame farm home building. Its facilities are entirely inadequate to serve the 3,400 students now enrolled at the college.

Graduates and former students who have attended music classes in Old Central Hall, erected in 1868, will know just how great an improvement the new million dollar Music Education Building will be. Now obsolete and hazardous from the standpoint of fire, and even dangerous because of structural weakness, the old wood frame, brick veneer structure (formerly a home for orphans of soldiers who served in the Civil War) will eventually be replaced, to make way for an instructional Office Addition to the Auditorium Building.

The new addition to the Arts and Industries Building will provide Safety Education and Driver Training quarters adjacent to the auto mechanics section of the Industrial Arts Department and at the same time provide much needed additional facilities for the crowded art and industrial arts classes.

Important to all those interested in the welfare of Teachers College is the fact that the recently appropriated funds will provide the first major new building projects, other than the Malcolm Price Laboratory school, since erection of the Arts and Industries Building in 1949.

Now, however, a good start can be made on the building program. Much credit must be given to the legislature and the governor of the state for recognizing the need and acting so promptly in this legislative session to provide funds to get the job underway. However, in view of the oncoming enrollment demands of the next few years, the need now is for an orderly, systematic way of financing further new construction.

As this is written (early in April) a bill is in the hands of the state legislature providing for a bond issue to be voted upon by the general citizenry in the next elec-

tion,—a bond issue in the amount of \$55,000,000 to provide funds for construction of buildings at all three state institutions for higher education over a ten-year period. Many alumni of the three state schools have given direct personal help to their respective alma maters through contacts with legislators to explain the needs of the state institutions for higher education. We sincerely hope that alumni of ISTC will continue to give this fine, active support. If the college or your alumni office can at any time be of help to you in facilitating this support, please let us know.

In addition to construction made possible by legislative appropriations, projects have been approved by the Board of Regents for a million dollar addition to the College Commons and a 200-man dormitory costing \$600,000. These two self-liquidating projects will be financed out of board and room fees rather than tax funds. The Commons addition will probably include an extension of the structure south and west of the present building, while the new dormitory—part of a large men's residence project anticipated for the future—will be built in the area south of the men's gymnasium and across 27th street.

HERE'S THE ISTC campus today. First new construction will probably be at left and upper right.

Third ACCJA a Success . . .

1959 Conference Features China

Five top-level speakers, a timely theme, large crowds, and extensive press coverage combined to make the April 13-15 period a busy and rewarding one for students, faculty and townsfolk and all personnel working with the Third All-College Conference on International Affairs.

TC STUDENTS AND FACULTY listened to speeches . . .

. . . And got a chance to meet visiting dignitaries informally . . .

Conference theme this year was "China and the Future of Asia." Presenting their viewpoints on this highly significant problem were Mr. Masayoshi Kakitsubo, Minister and Deputy Permanent Representative of Japan to the United Nations; Mr. Shao-Chang Hsu, Minister Plenipotentiary from the Chinese Embassy in Washington; Ambassador Chandra Shekhar Jha, Permanent Representative of India to the UN; John Holdridge, a specialist in Chinese affairs from the U.S. State Department, Howard Boorman, director of a Chinese research group at Columbia University.

General sessions were held in the men's gymnasium. There to cover the speeches were representatives from both national press associations plus newspapermen from several major cities. Reporters had a chance to interview the visitors in press conferences, in informal coffee hours, and in dormitory discussion groups. The flashbulbs popped steadily for three days. Total attendance soared near the 10,000 mark.

Most of the planning and arranging for the thousand and one details inherent in such a conference were done by college students. Separate committees took care of hospitality, physical arrangements, exhibits and displays, discussions, publicity, etc.

. . . And when it was over, both visitors and hosts had made important new friends. (Below, Mr. Kakitsubo, Below left, Mme. Jha, Left, Mr. Hsu.)

TC Junior Sings With King of Swing

Donna Musgrove

Millions of American television viewers got a good look at Donna Musgrove, a TC junior from Waterloo, on the evening of April 10.

Donna appeared in a Benny Goodman "Swing into Spring" show along with such big-name stars as Ella Fitzgerald, Peggy Lee, Andre Previn, and Lionel Hampton. She sang "You Turned the Tables on Me," with the Hi-Lo's.

Donna signed a contract for the program around the middle of March but didn't release her secret to the public until March 23. When the news broke, Donna's telephone rang—and rang. "It started that evening and I didn't get to bed until 4 in the morning," she said. "One man from the New York Journal American even called me and asked me to sing a few bars over the phone."

Like so many other promising newcomers in the show business field, Donna took advantage of a break—a tremendous break in her case. It all started last fall when Goodman came to the campus for a concert. Donna was then singing with the Mark V's, a student quintet. On the after-

Prof. C. L. Jackson Dies; Former CLS Principal

C. L. Jackson, member of the faculty at the Iowa State Teachers College since 1924, died at his home April 9 of a heart attack.

Professor Jackson came to Teachers College as principal of the Campus Laboratory School (now the Malcolm Price Laboratory School) and served as principal until 1947 when he resigned the principalship to devote full time to the teaching of science and mathematics. He became an emeritus member of the teaching department in 1952.

Professor Jackson was born in Gilmore City, Iowa, in 1882, and educated in the schools of that city. He received the BA degree from Grinnell College in 1913 and the MA from the State University of Iowa in 1924.

He was Principal of Schools in Maurice, Nevada, and Webster City, Iowa. He served as Superintendent of Schools at New Sharon (1916-19) and Rockwell City (1919-23) previous to coming to Teachers College.

He was a member of Phi Beta Kappa, Phi Delta Kappa, the American Association of University Professors, the National Education Association, and the Iowa State Education Association. He was a member of the Methodist Church and of the Lions Club of Cedar Falls.

Professor Jackson is survived by his wife; a brother, J. D. Jackson of Burlington; a daughter, Mrs. H. M. Williams of Bethesda, Maryland; and three grandchildren, Robert, John and Betty (now Mrs. Don Miller of Bethesda, Maryland).

Mr. Jackson

noon preceding the concert, one of its members took the bull by the horns, so to speak, and asked the famous "King of Swing" if he would listen to a few samples. Goodman did and was so impressed he took the Mark V's to some of the cities on his midwestern tour agenda.

Result: she got a call from Goodman in November inviting her to sing in Philadelphia and Pittsburgh. That bit of news created somewhat of a flurry of excitement on the campus. In March Benny asked her to appear on his TV show.

ISTC Foundation Begins First Year

Funds for scholarships, research grants, and library collections are among the seven major objectives of the newly formed Iowa State Teachers College Foundation now receiving support.

One of the most heartening early signs of understanding on the part of Alumni has been the large number of undesigned gifts to the Alumni Association as well as to the ISTC Foundation. This enabled the Alumni Association Board to allocate substantial sums to the Foundation for the support of the Alumni Scholarship program and at the same time maintain an adequate balance in its own treasury for the important work in the area of public information relative to the needs of ISTC in Iowa, and to support the recognition and club activities of the Association.

What is the Iowa State Teachers College Foundation?

The Iowa State Teachers College Foundation is a non-profit corporation organized and operated for scientific and educational purposes.

What is its purpose?

The purpose of the Foundation is to seek, receive, and manage gifts from private sources for the advancement of education and the Iowa State Teachers College.

Why is it Needed?

1. Rapidly increasing enrollments will necessitate tremendous increases in tax funds during the next 12 years to provide minimum plant and faculty facilities. The Foundation will give alumni and friends an opportunity to support projects of merit for which state funds are not available. This supplemental support may mean the margin of difference between a mediocre school and a first class institution.

2. The Foundation is needed to serve as

nearly as possible as a coordinating agency and a permanent channel through which all gifts and bequests may be made to the Iowa State Teachers College.

3. Funds are needed to provide tangible evidence to the taxpayers of Iowa and others interested in higher education that our alumni are appreciative of the benefits they have received and concerned about the welfare of the institution.

4. The Foundation enables the donor to take full advantage of Federal Income tax deduction.

Do Other Tax Supported Institutions Have Similar Foundations?

Some 60 tax supported colleges and universities have made significant contributions to their Alma Maters through some organized fund. The Foundation provides a medium through which all our alumni can do their part to make Iowa State Teachers College THE LEADER in its field.

Who Formed the Corporation?

At the request of the Board of Directors of the Alumni Association, the President of the college established a committee composed of faculty and alumni to make recommendations regarding a foundation. The Articles of Incorporation were drawn by the College Administration from these recommendations and approved by the State Board of Regents.

Who Will Conduct the Business of the Foundation?

The business of the corporation will be conducted by a Board of Directors of nine members. Members of the Board of Directors will be chosen as follows:

Ex Officio—President of Iowa State Teachers; President of Iowa State Teachers College Alumni Association; Director of Alumni Affairs at Iowa State Teachers Col-

Wendell Bragonier Foundation Head

Dr. Wendell Bragonier has been appointed as the first National Chairman for the newly formed Iowa State Teachers College Foundation.

As such, his main effort will be directed toward building a regional organization of volunteer workers throughout the United States. Regional Chairmen will be appointed who in turn will need local class agents to support an organized effort on behalf of the ISTC Foundation.

Alumni affairs director Milo Lawton says that he feels certain that Wendell will find the same spirit of cooperation among alumni that has always prevailed when they have been called upon individually to do an important job.

Dr. Bragonier has many exceptional qualifications for the post:

He has had extensive experience in teaching both at the high school and college level, and is presently head of the Botany department at Iowa State College.

He is a graduate of the Campus High School as well as the College. This has en-

Dr. Wendell Bragonier

abled him to have a good understanding of the total academic program as well as a longer association with the College faculty than most alumni.

Dr. Bragonier is immediate past president of the Alumni Association and a member of the Board of Directors of the Alumni Association. As such, he is thoroughly familiar with the present policies governing the activities of the Alumni Office and the objectives and agencies of the Association.

As a faculty member of Iowa State College he has been closely associated with a highly successful development fund. His enthusiasm and counsel have been a great help in establishing the Iowa State Teachers College Foundation.

lege, Member of the State Board of Regents.

Elected—Two members from nominations made by the President of ISTC. Two members from nominations made by the Board of Directors of the Alumni Association. One member from nominations of the Student League Board.

How Will Projects Be Initiated For Foundation Support?

1. Faculty members will submit projects for consideration through their department heads.

2. Alumni will submit ideas for projects through the Board of Directors of the Alumni Association.

3. Special interest groups may submit projects directly to the Foundation Board.

4. Donors may designate special interest for which a gift is to be used.

What Are the Goals of the 1958-59 Campaign?

1. The first goal of the Foundation during 1958-59 is to have 3,000 contributors. Increased participation will assure adequate support. One thousand persons have already responded.

2. The second goal is to begin forming a regional corps of volunteer workers to promote the work of the ISTC Foundation during 1958-59.

When Does the Current Campaign Close?

The fund year for the Foundation will be from July 1st to June 30th. You can help by making sure your gift is received before June 30th.

Foundation Gets Boost From Theta Alpha Phi

The first of the Special Interest groups to join forces with the ISTC Foundation is the campus chapter of the Theta Alpha Phi (National Honorary Dramatic Fraternity). For many years this group has supported a tuition scholarship for an undergraduate student who excelled in dramatics. The money has been provided by gifts from alumni of Beta chapter who are interested in encouraging young men and women with talent to pursue their studies in this area.

The Theta Alpha Phi Board has requested the Foundation to accept the funds they have on hand. They have designated these funds for the support of a scholarship for a drama student. They have asked that this project be included each year as one of the projects of the Foundation, to enable those who have been contributing to this project regularly to be recognized with other donors to the Foundation, to prevent members of the group being resolicited by the Foundation after they have made their contribution, and to enable others to contribute to the support of this project if they so desire.

This action will help the Foundation to give a more accurate report of the financial support being received by the College from other than tax sources and enable members of the Foundation Board to have first hand knowledge each year of the work the group is doing.

This will in no way affect the present method of granting the award. This will be done as it has in the past by the Theta Alpha Phi Board in accordance with the college policies regarding scholarships.

Dr. William C. Lang Replaces Dean Nelson

Dr. William C. Lang

Dr. William C. Lang, head of the Iowa State Teachers College social science department, has been named the new Dean of Instruction at the college, effective June 4.

Formal approval of Lang's appointment came in a Board of Regents meeting in Des Moines recently. He replaces Dr. Martin J. Nelson, a staff member at the school for 35 years. Dr. Nelson is retiring July 1.

Dr. Lang joined the Teachers College staff as an associate professor of history in 1949. He was named department head in 1955.

Born in Pittsburgh, Dr. Lang served as professor of history and speech, as acting president and as dean and professor of history at Yankton College in South Dakota from 1936 to 1949. He received his bachelor's degree from Yankton in 1931, his master's degree from the State University of

Lab School Named For Dr. Malcolm Price

Alumni, members of the legislature, and local citizens were on hand at the dedication of the Malcolm Price Laboratory School March 23.

The school, formerly known as the Campus Laboratory School, was named in honor of Dr. Malcolm Price, college president from 1940 to 1950, and now a member of the department of education and psychology.

Dr. John Emens, president of the Ball State Teachers College in Muncie, Ind. gave the dedication address in the school's auditorium that afternoon. Activities started at 9 a.m. with registration, followed by tours and open houses. Construction of the \$2,500,000 school was begun in 1950 and completed in various stages during the intervening years. It now occupies approximately 35 acres in the area north and west of the main college campus.

President J. W. Maucker said prior to the dedication that "The college and the citizens of Iowa are greatly indebted to Dr.

Iowa in 1936, and his doctor's degree from SUI in 1941. He has also done post doctoral study at the University of Minnesota.

He is a member of Pi Gamma Mu, Pi Kappa Delta, Phi Delta Kappa, the American Association of University Professors, the Iowa State Education Association, and the American Historical Association.

He is married to the former Esther Buchholz of Tyndall, S. Dak., and the father of two daughters, Barbara Ann, 19, and Mary Margaret, 11. He lives at 603 W. 18th in Cedar Falls.

The State Board also approved the appointment of Dr. Lang to serve on the inter-institutional Committee on Educational Coordination.

FORMER ISTC PRESIDENT Malcolm Price receives roses from friends and colleagues at ceremonies dedicating Campus Lab School to him.

Price for his leadership in the establishment of this large and well-equipped school and teaching laboratory. He worked on this project with perseverance borne of deep conviction. As a result of his vision and effort the Iowa State Teachers College now has a teaching laboratory second to none."

Dr. Price, a Cornell College graduate, came to ISTC in 1940 after an 11-year stint as personnel director in the Detroit public schools. He received his master's and doctor's degrees from the State University of Iowa.

ATTENDING THE DEDICATION ceremonies were (L.) former State Senator Weichman, and Iowa Attorney General Norman Erbe, here chatting with Mr. Robert Paulson of Price Lab School staff.

We Hope All of You Will be at the

Alumni Reunion . . . May 31, 1959

Here's a special map for those Alumni who haven't been on campus for a long time. We hope you plan to join us for the Alumni-Faculty Reunion, Sunday, May 31st. All Alumni are invited and special recognition

will be given to the classes of 1899, 1909 and 1934. Ed Goetch, Grace Aitchison and S. A. Cohagan have arranged for a special class dinner and meeting Saturday evening, May 30th, at the Commons to be followed by a

full day of activity on Sunday.

Class activity for the class of 1934 will begin Sunday morning with a 10 o'clock coffee according to reunion committeemen, Bob Brown, Harriet Gowdy Hecklinger, Wilma Morgan

Barnes, Truman Manship and James Daugherty.

Do come if you can. If it's impossible please send us a letter and recent snapshot of yourself to pass along to your classmates.

Much Ado This Summer On the TC Campus

There'll be plenty of activity on the campus this summer with workshops, institutes, and laboratory sessions on the college agenda.

Candidates for the master's degree enrolled in the eight week summer session, which will run from June 15 to August 7, will have the option of writing a thesis or of taking additional hours to satisfy degree requirements.

In addition to the undergraduate and graduate students, 75 junior high school science and mathematics teachers will be on the campus to participate in a special institute made possible by a grant from the National Science Foundation.

Other science department students will study soil, plant, and insect life in a three-session conservation camp at the Springbrook State Park in Guthrie Center. The first session will be held from June 7-27, the second from June 28 to July 13, and the third from July 19 to August 8.

Some science students will also get a first hand glimpse into zoological life in a Lakeside Laboratory Session to be held at Lake Okoboji from June 15 to July 17 and from July 20 to August 21.

Girls State week will be held from June 14 to June 20. Art department students will spend the entire eight weeks touring Washington, D.C., Philadelphia, New York, Boston, Cape Cod, Cleveland, Toledo, Detroit, and Chicago, where they will see some of the nation's leading art galleries and museums.

An Air Age Education workshop will also be held during the eight weeks to broaden student backgrounds in aviation, aviation transportation, meteorology, and physical and political geography.

Other events: A language, speech, and literature workshop will be held from June 15 to July 2, a ceramics workshop

Panther Roundup . . .

Spring Sports

April means spring sports, and the four athletic teams at I.S.T.C. all opened their seasons.

The Panther track team, with another unbeaten indoor season tucked away, has a rosy outlook for the spring. Among the accomplishments of the cindermen on the indoor track were championships in the North Central Conference quadrangular and the Iowa College invitational meet. Bradley University, undefeated a year ago, also fell victim to Coach Art Dickinson's team in a dual meet.

Balance was a key word for the cindermen's success. Without a "big winner," the Panthers relied on a fine cross-section of talent. Big meets during the outdoor season will be the Iowa Teachers Relays at Cedar Falls Apr. 18 and the North Central Conference meet at Sioux City May 22.

Inexperience is the word for Coach Mon Whitford's baseball team. With only six lettermen back, the Panthers will defend their North Central Conference title with a

from June 22 to July 2, an elementary curriculum workshop from June 22 to July 2, a school library workshop from June 29 to July 11, and a school public relations workshop from July 5 to July 8. Subject for this meeting will be "Securing Public Understanding of the Needs of Secondary School Education."

An elementary leaders workshop and a home economics workshop will be held from July 6 to July 17. Problems of student leadership in the public schools will be discussed in an Iowa Association of Student Counselors meeting from July 19 to August 8.

Post summer sessions are scheduled from August 10-21.

Get Underway

veteran pitching staff, and experience at shortstop, second base and catcher. If a few of the sophomores come through, however, the team would still have a good chance of winning the league crown and gaining an N.C.A.A. playoff berth, as it did a year ago.

Coach Jim Clark has the nucleus of his conference championship golf team on hand, and a fine campaign shapes up for the Panther linkmen. Not so in tennis, where Coach Bill Koll will have to dig for a replacement for three-time conference singles champ, Bill Kibbie.

ISTC Alums Gather At NCAA Tournament

I.S.T.C. was well represented at the National Collegiate wrestling tournament held in Iowa City Mar. 26-28. Alums were everywhere, many serving in official capacities during the three day meet.

An alumni luncheon was held Mar. 28, and about 50 attended the informal get together. Dr. Ray Schlicher, I.S.T.C. placement director, organized the luncheon.

Earlier in the day, Dave McCuskey, Panther wrestling coach from 1931 to 1952,

was honored at a special breakfast by his former wrestlers, and most of them had competed at I.S.T.C. McCuskey is now mat coach at the University of Iowa.

Success and Failure Mixed for Winter Sports

Winter sports at I.S.T.C. wound up on a happy note, after some disappointing moments at mid-season.

The wrestlers, who lost four of five road engagements, took their last pair of home assignments to finish unbeaten in the Panther gym. Final record for the matmen was eight wins and four losses. Defeats came at the hands of three Big Ten teams, and the N.A.I.A. champion, Mankato State.

The basketball team started surprisingly strong, considering three sophomores in the lineup, and won six of its first ten games. But the cagers also found the road away from home a rocky one, and slipped at mid-season. A strong finish of three straight at season's end brought the final tally to 11 victories and 12 losses. The Panthers were 6-6 in the conference, good for fourth place.

Both basketball coach Jim Witham and wrestling coach Bill Koll were impressed with the quality of their freshman squads, so the outlook for next season points toward improvement in both sports.

SIX FORMER NATIONAL CHAMPIONS got together at the I.S.T.C. alumni luncheon during the 1959 N.C.A.A. wrestling tournament. Former Panther mat greats seated around table from left are Bill Smith, wrestling coach at the University of Nebraska; Bill Nelson, wrestling coach at Kalamazoo, Mich., high school; Russ Bush, wrestling coach at Eastern Michigan University; Gene Lybbert, Cedar Falls insurance man; Bill Koll, I.S.T.C. wrestling coach; and Keith Young, wrestling coach at Cedar Falls high school.

Dean Nelson Discusses TC Future

Professorial complacency, intercollegiate athletics and a multi-purpose ISTC were some of the subjects commented upon by Dean Martin J. Nelson, who is retiring July 1st after 25 years as Dean of Instruction.

Dean Nelson made his comments in a talk at a faculty meeting this spring.

Having pointed out that for many years he had supported the idea of maintaining ISTC as a college devoted exclusively to the education of teachers, the Dean said: "Gradually and with reluctance, I have come to the conclusion that times have changed and that the future of the college and the future of the state will be best

Dean Nelson

served if we continue to stress our main business—the preparation of teachers for the public schools—but abandon our policy of relative isolation from other aspects of higher education."

Dean Nelson said that present conditions could lead to decreased enrollment at ISTC. Teachers are becoming more abundant, he said, and those in the profession tend to remain longer as requirements for certification are increased to cover a longer period of pre-service education.

In addition, the Dean said, ISTC is in a rapidly growing area. "Do we not," he asked, "have an obligation to this section of the state to take our share of the college-bound students?"

On the subject of intercollegiate athletics, Dean Nelson told the faculty he believes there is an overemphasis on the national scene that poses a great threat to the fundamental purposes of a college education. He pointed out that, although he was

not opposed to the continuance of athletics, he hoped that some method could be found to eliminate the professional aspects of so-called amateur athletics, and subsidies to boys simply because they excel in a sport. Dean Nelson said, however, that athletes should not be eliminated from consideration for scholarships simply because they are athletes.

Pointing out that the athletic situation is by no means out of hand at ISTC, he suggested that the problem should become the concern of some national organization, for no one college can stem the tide of professionalism by its own individual endeavors.

Although the Dean took occasion to chide the faculty for their occasional preoccupation with such matters as "limited parking facilities, the disadvantages of extension work, academic rank or salary, and the limitations of the administration," he indicated that he was favorably impressed with the quality of the ISTC faculty. "In looking at college faculties for the North Central Association or for my own amazement," he said, "I have never found another faculty that I would be willing to exchange for ours."

On other matters, the Dean had this to say:

Graduate programs are tending to be weakened by submission to pressures to fill educational positions as quickly as possible, to grant degrees in as short a time as possible, and to grant as many degrees as possible.

Teachers should have a clearer concept of their teaching goals and they should sharpen their testing procedures. Because of the common failure of instructors to measure accurately the outcomes of instruction, he has been something less than

enthusiastic about the proposal to grant advanced standing on the basis of tests, interested as he has been during all of his professional career in the promotion of testing.

He has been encouraged by the increased crossing of departmental boundaries which he felt to be important to achieving the best educational program within the time limits available.

Dean Nelson will leave soon after his resignation becomes effective to spend his retirement in Arizona.

The CAMPUS TODAY

Continued from Page 1

ISTC Music Festival

Students and faculty members of the music department performed in a variety of ways during the annual Music Festival from April 26 to 29.

The department entertained the campus with band and orchestra concerts, chorus singing, and solo numbers. Considering the fact that the A Cappella Choir was forced to spend a night on its blizzard-stalled bus while returning from a tour in March, and that the concert band had to skip one of its tour dates later that month because of more bad weather, the department was glad to perform at home.

Antigone

The Greek classic, 2,000 years old, *Antigone* was presented this spring by ISTC students as a contribution to the International Theater Celebration.

The play was designed and directed by Dr. James Clay of the Language, Speech and Literature Department. Cast members were Priscilla Hake, Terry Crane, Pat Maulthauf and Sandra Hughes, Cedar Falls; James Dunlavy and Robert White, Mt. Pleasant; William Becvar, Decorah; Nancy Wallace, Ames; Craig Rule, Denison; Mary Paul, Harlan; Gordon Odegard, Waukon; and Elbin Cleveland and Robert Helland of Cedar Rapids.

Science Fair

Two Cedar Falls students walked off with the top awards in the 6th annual Northeast Iowa Science Fair this spring. They were Mary Sue Wilson, 15, of Price Laboratory School and daughter of ISTC Professor Leland Wilson, for her experiments on the rate of resistance developed by bacteria to anti-biotics; and David Ecklein, 17, Cedar Falls High, for his electronic checker player.

Both will now compete in the National Science Fair in Hartford, Conn., May 6-10.

Art Fair

Four high school students were awarded college scholarships at the annual Iowa State Teachers College Art Fair. They are Caryl Ann Slaughter, Waterloo; Mary Kay Sergeant, Bettendorf; Pamela Long, Marshalltown; and Janice DeVine, Bettendorf.
