A Jumping Genius—I.S.T.C.'s Ron Sturch

Story on Page 7
15,000 Persons Attend "Little Summit" Sessions

Germany's Fate Gets Intense Study at ISTC

World affairs, diplomats and international discussions have always been far removed from the cornfields of Iowa. But in recent years, the picture of the Iowa farmer with a straw in his teeth has begun to dim. An awareness, in fact, of an acute interest in world affairs has permeated this long time land of farming on the edge of west.

In the last few years, delegations of Iowa farmers have visited the Soviet Union to study USSR farming methods. Iowa machinery companies and seed corn distributors trade across the barriers of the Iron Curtain. A scientist that grew up in an Iowa town is heralded throughout the country for his experimental scientific equipment sent into orbit with Explorer I.

Right in line with this growing interest and activity in world affairs are the 3,000 students at Iowa State Teachers College just completing an intensive study of the problems involved in a divided Germany and a general European peace settlement.

Disappointed in the understanding of world affairs they got by merely reading in books and newspapers, these "find-out-for-yourself" students organized the All-College Conference on International Affairs to stimulate their thinking about the American role in world affairs, not just as idle spectators but from the personal view of studying, active, participating U.S. citizens.

In mid-April, they climaxd their study of the German Question at a conference attended by high diplomatic officials from Russia, Germany, Yugoslavia, Poland, the Federal Republic of Germany, Great Britain, France, and the United States, and some 15,000 spectators.

They asked these nations to present their views on Germany and the fate of Europe, not in letters or in the halls of the United Nations where these discussions seem so remote and fruitless, but as spoken by representatives of these governments in lectures, classroom discussions, coffee hours, at the dinner tables, in dormitory discussions, and in press conferences on their campus in Cedar Falls.

In what some news sources have termed a "Little Summit Conference," these internationally minded students had a chance to hear each nation express its views of the problem. They questioned those views, seeking answers directly from diplomats who have those answers.

A paradoxical situation arose from this request by Iowa students about problems half way around the world. The same Russian government that said as late as February 28 that "the reunification of Germany is first and foremost the concern of the German people" agreed to discuss this point in Cedar Falls while refusing to discuss it at a Summit conference.

Last year these same students conducted an intensive study of the Tensions in the Middle East. Probably on few campuses in the nation will one find the understanding of the areas of disagreement on this trouble spot that is found among this group of future Iowa teachers.

One delegate to the conference, Mr. Vladimir Barkovsky, Counselor of the Delegation of Union of Soviet Socialist Republics to the United Nations made his second trip to Iowa. Barkovsky, a smiling mild mannered diplomat spoke on the Middle East question last year, and along with two other Russians, presented Russia's views on Germany and Europe this year.

The official delegates were hosted by the students, visiting and lecturing to them in classrooms and living quarters about the problems arising in the societies they represent.

(Continued on page 7)
Russian Research Specialist Tells of U.S.S.R. Education System

A specialist with Harvard's Russian Research Center, Dr. Nicholas DeWitt addressed several college faculty and student groups who have been studying Russia's educational system at ISTC. "A democracy cannot survive without the best of education for each one, but we must admit the truth, that not all our education is the best or a safeguard for democracy," according to DeWitt. He went on to say that our destiny will be determined by the brains and minds of men, not by the material things in life. He urged Americans to be concerned with their own requirements and strength and not primarily with those of the Russians.

Old Gold Queen and Attendants Chosen by Air Force Squadron

The 1958 Old Gold beauty queen, Carol Jungman of Booneville, was chosen from 17 candidates by a 800-man Air Force squadron in Greenland. Three attendants selected: Barbara Cover, Waterloo; Sue Breckenridge, Newton; and Sharon Wykle, Radcliffe.

500 Young Artists Attend Annual ISTC Art Fair

About 500 high school students and their teachers attended the Art Fair in April sponsored by the college Art Department. Four four-year art scholarships and numerous art-material awards were given to students on the basis of original work and academic records. Visiting lecturer was Dr. Allen S. Weller, Dean of the University of Illinois College of Fine and Applied Arts. A panel discussion and special sessions by the college art faculty and students with demonstrations of art technics and mediums were held to interest the visitors in art education.

Four-Year Elementary Increase

Second semester enrollment totaled 3,153 students as compared to 3,206 for the first semester. The registrar's office pointed out that there is a marked increase in the number of students enrolled on the four-year elementary program which corresponds roughly with a decrease in the number of students on the two-year elementary program.

Orchesis Recital

The modern dance organization at ISTC presented its annual Orchesis recital which consisted this year of three dance suites. In addition to the dance suites, the twenty dancers in the recital featured original choreography and compositions such as a dormitory shower incident, events typical in a midwestern community, and various moods.

Music Conference Features Four Concerts

The Tallcom Music Conference for Iowa school music teachers at ISTC in March featured concerts by the Davenport Junior High School orchestra, the Augustana College choir, the Boone High School orchestra, and a Tallcorn Conference band (consisting of students selected from bands over the state). Sessions were held on vocal ensemble, school room music, community school piano teaching, the choir, rehearsal technics, the orchestra, and the string ensemble.
Seriousness, Humor, and Mystery in Theatre Month Drama

The question of man as his own worst enemy is treated in a new drama, "Captive at Large" which students at ISTC presented during March in recognition of International Theatre Month. Dr. James H. Clay, assistant professor of speech and director of the play, described it as "A startling combination of seriousness, humor and mystery is used to treat the question in 'Captive at Large'." The play was produced by the college Department of Languages, Speech and Literature as part of a world-wide movement to promote international understanding through drama.

Summer Science Seminar for Outstanding Jr. High Students

This summer an "ideal model" seminar for outstanding junior high school students of science and mathematics will be established on an experimental basis at the ISTC Campus Laboratory School. The eight-week seminar will include enrichment units which emphasize science laboratory work and investigation of modern mathematics for 40 to 50 junior high school students in schools within commuting distance of ISTC. These students must rank in the upper one-fourth of their science and mathematics classes to qualify for the seminar. Evaluation will be accomplished by use of follow-up questionnaires and interviews with the students and their teachers in their regular schools. Dr. Ross A. Nielsen, associate professor in charge of the mathematics, said concerning the seminar, "Junior high school students are in the formative years of making a decision about their life-work, and the evaluation will be designed to get an idea of what influence, if any, a seminar of this kind has on their decisions."

Pat Maxwell Is Guide at World Trade Fair

Six months in Europe as one of 300 American college students acting as guides at the Brussels World Fair . . . a dream? Not for Patricia Maxwell, senior at Iowa State Teachers College, who left the U.S. from New York one week after being advised of her selection.

Five days of frantic activity followed before the 21-year-old red-head left Cedar Falls with steamer trunks, suitcases, and her hands full of documents and a camera.

The 300 guides were chosen on the basis of several criteria, but all had to be able to speak excellent French. They are all between the ages of 19 and 25 with at least two years of college education.

Air Age Education Workshop On Campus This Summer

They'll be flying in classes this summer at Iowa State Teachers College, as a new course is initiated in the summer session schedule. The course, Air Age Education Workshop, will combine actual flying experience with the development of new knowledge and teaching skills necessary for an age of air and space travel.

The course, carrying four semester hours credit, will follow the pattern of other workshops organized with the assistance of the Iowa Air Age Council. Classes will meet every afternoon, June 16 through Aug. 8, under the direction of Dr. William H. Dreier, assistant professor of education.

Open to juniors, seniors and graduate students, the course may be taken alone or with other classes. Inquiries about the course and scholarship assistance should be addressed to Dr. Dreier, Iowa State Teachers College, Cedar Falls.
Oregon Line Coach to Install “T” Formation

HAMMER NAMED ISTC GRID COACH

Willard (Bill) Hammer, University of Oregon line coach, has taken over the head football coaching position at Iowa State Teachers College. He is the second head football coach at Iowa Teachers since 1936, succeeding the late C. L. (Buck) Starbeck, who died of a heart attack last December.

Hammer, 38, went to the Pacific Coast Conference school in 1953 as freshman coach, moving up to the line coaching position in 1955. He gained national recognition last New Year’s Day when Oregon’s line checked Ohio State’s mighty backfield in the Rose Bowl game.

The new coach assumed his duties here early in April. He holds the academic rank of assistant professor.

Hammer will use a varied offense, depending considerably on the T formation. Biggest problem this spring is locating a quarterback for the new offense.

Hammer played guard for three years at Springfield, where he was graduated in 1949. He then served as line coach there for three years.

Hammer, who holds the rank of Lt. Commander in the Coast Guard Reserve, was called to active service during the Korean War and served as line coach and wrestling coach at the Coast Guard Academy from 1951 to 1953.

He then went to Oregon as freshman football coach and varsity wrestling coach. His wrestling teams have finished second three times in the Pacific Coast Conference, and he had one wrestler who went to the 1956 Olympics.

Hammer received a Master’s degree at Springfield in 1950. He has completed considerable work toward a Doctor’s degree at Oregon.

Hammer was an outstanding football and basketball player at Anacortes, Wash., high school, where he was graduated in 1937. He was a guard in football and was named to the “All-Northwest Washington” teams in both sports.

During World War II he served with the Coast Guard in Alaska, the North Atlantic and the Pacific, where he commanded an LST. He is a graduate of the Coast Guard Academy, and won nine campaign ribbons during the war.

Hammer and his wife, Dorothy, have four children; Craig and Clyde, 10-year old twins; Carl 6; and Carol, 4.

Hammer is past-president of the Pacific Coast Intercollegiate Wrestling Association (1955-56) and has served on the NCAA wrestling rule committee (1954-57).

Iowa State Teachers College
Wrestlers Power Through Tough Schedule for 8 Wins

Even the most optimistic fans showed mild disbelief when the final record was posted for Iowa Teachers’ wrestling season this past season. Was there an error in the calculations, they asked?

The answer was NO. The Panthers, figured to be fair—but by no means tough—ripped through an 11-dual meet schedule with 8 wins, 2 loses and a tie. Along the line had come a second place finish in the National Intercollegiate (NAIA) tournament.

All this, with only a handful of lettermen and a new coach to start the season, was more than the paying customer had asked for. There was ample praise for the scrappy Panthers, and even more for Coach Ed Lyons, filling in a year for Bill Koll.

Mild-mannered Ed must have taken the wrestling reins with a hesitant hand. Only four lettermen were available to face one of Teachers’ most formidable schedules.

“I’m not really the coach,” Lyons said before the season started. “I’m more of a supervisor.” But in between his supervising, Ed must have done some coaching. He developed three fine sophomores—Jerry Lane, Chuck Patton and Jerry Ray—and brought some holdovers along to fill the gaps.

Dick Heaton and John Vovos are the only regulars from the team who won’t be around another season. The methodical Heaton waltzed through his dual-meet competition without a loss, and added the NAIA 157 pound championship to his laurels. Vovos lost only one dual match and was also an NAIA king (137 pounds).

While the Panther freshman team this winter didn’t hold a great deal of talent, enough should move to the varsity next season to keep Iowa Teachers around the top in the nation’s wrestling circles.

Germany’s Fate, Cont.

sent. Most of the officials remained on the campus for three full days, living in college dormitories and getting the flavor of American life in the Midwest.

Presenting the British viewpoint at the opening session of the conference was R. W. Jackling, Head of Chancery, British Embassy, Washington, D. C. Other delegates were: Richard Balken, Secretary, Embassy of the Federal Republic of Germany, Washington, D.C.; Jokas Brajovic, Consul-General, Yugoslavia, Chicago; Pierre Boyer, Counselor of France, Washington, D.C.; Edward Kmieck, First Secretary of the Polish Embassy, Washington, D.C.; and Robert Creel, German Affairs, U.S. State Department.

Graham Hovey, a Minneapolis editorial writer presented the summary speech to close the conference.

Hovey, former student at ISTC and resident of Cedar Falls received prolonged applause for a speech in which he was sharply critical of state department policies in Europe.

Basketball Team Has 9-14 Season Record

The 9-14 record hung up by the Iowa Teachers basketball team this past season will certainly not go down among the most successful campaigns by the Panthers, but the figure does have a distinction.

It’s the first time a Jim Witham coached team has failed to finish a season above the .500 mark, and Witham’s record goes back more years than he’d probably like to remember.

The lack of height, and the inability to win the close ones, were the key factors in a losing cage season for Teachers. With a tall freshman team coming up that swept through their schedule undefeated, the outlook is brighter for next year.

ALUMNUS—May, 1958 7
European Doctorate to Elementary Grad

Mrs. Frances Bartlett Kinne, (Elem. '36) was one of 12 successful candidates for a Ph.D. at the Johann Wolfgang von Goethe University last summer. She became the first Armed Forces dependent to attain a post-war doctorate at a German University.

Mrs. Kinne is the wife of Col. Harry Kinne, Commanding Officer of the Frankfurt Subarea. She spoke no German when she arrived in Germany with her husband little more than two years ago.

Mrs. Kinne earned her B.A. and M.A. in music education at Drake University. She taught music in the Des Moines public schools before she married Col. Kinne in 1948. Shortly thereafter, they were transferred to Kankow, China, only to soon leave for Japan on the last dependent evacuation ship from China.

Once in Japan, Mrs. Kinne became a volunteer lecturer at the University of Tokyo, where she instructed in folk music. She served as music consultant for the Far East Command.

During her studies in the Frankfurt university, where she majored in music and minored in English literature and philosophy, Mrs. Kinne at first found it difficult to adjust to German educational techniques.

Williamson, '53, Continues South American Study

Former Cedar Falls resident Bill Williamson, (B.A. '53) recently received an additional grant from the Brazilian and United States governments to continue a journalistic research program in Brazil.

Williamson began a year's study in Brazil under a fellowship awarded by the Convention for the Promotion of Inter-American Cultural Relations, after being selected for the grant by the State Department of the United States and the Office of Foreign Relations of the Brazilian government.

She recalls, “At first, differences in registration procedures, the European method of voluntary attendance, and several other factors bewildered me. But once I crossed the language barrier, university life became a matter of pleasant routine.”

Iowa State Teachers College
Sturch Stars in Jumps, Vaults, Hurdles

The Army likes specialists, but Uncle Sam might have a tough time converting Ron Sturch to a single occupation when the Iowa Teachers track star starts his military stint next fall.

Versatile Ron doesn't like to tarry too long at any one field of endeavor—and who can blame him, when he does so many things so well? Certainly not his coach, Art Dickinson, who has had the pleasure of handling the Waterloo senior for four years.

"Ron can do more things and do them better than any boy I've ever coached," says Dickinson, whose experience as a track coach spans 38 years—the last 33 as head man at Iowa Teachers.

Five Events

Sturch has relied mainly on five events to achieve track stardom—the pole vault, high jump, broad jump, high hurdles and low hurdles. Occasionally, he has found time to try out something different.

Like the day when an indoor meet was already sewed up, and he ran the 60-yard dash just for kicks. He finished second.

If Sturch had the ability to be in two places at once, there's no telling how many things he might have done in a single day on the track.

"Ron never competed in all the events he could have," continues Dickinson. "We had to draw the line somewhere, so we settled on the five things he did the best, and sometimes we let him compete in an extra event or two.

Team Man

"He's a great team man, and always went along with what was best for the team. Would he have been better if he had specialized in an event or two from the beginning?

"Yes," says Dickinson, "Ron would have become more skilled if he had stuck to a couple of things and put all his efforts into them. But he has helped the team more by using all his talents, which are considerably more than those of the average athlete."

Sturch feels his best events are the pole vault and hurdles. That's what earned him recognition at West High School in Waterloo, where he was a three sport man.

Freshman Intrasquad Champ

The first time Dickinson became aware of Ron's versatile abilities was during the all-around intrasquad competition when Sturch was a freshman.

"That really opened my eyes as to what Ron could do," says the venerable coach. "He won the championship as a freshman, and has won it every year since then. He broke his own total-point record for the event this year."

Ron Sturch will be gone from the scene next winter when Dickinson begins his 26th season with the Panthers, and there probably won't be another one like him for a long time.

Highest Scorer in History

He's left his mark on Iowa Teachers track records, and has personally accounted for more points in cinder competition than anyone in the history of the school. As this is being written, Ron is close to breaking the 170-point season's record he established last year.

Sturch will graduate at the end of summer school, and after serving his time in the Army, plans to enter the coaching field.

And if teaching by demonstration is a good method, Ron should come up with one of the outstanding track teams in the country.

ALUMNUS—February, 1958
PRESIDENTS OF THE THREE STATE INSTITUTIONS presented the story of "Building Needs" to a Northeast Iowa TV audience in April under the joint sponsorship of the Adult Education Committee of United Services of Black Hawk County and KWWL-TV, Waterloo.

The panel program was moderated by attorney Robert Buckmaster, an ISTC alumnus. Presidents Virgil Hancher, SUI; James Hilton, ISC; and J. W. Maucker told of needed campus construction during the hour-long show.

FIFTY-THREE STUDENTS WILL SAIL for England this summer on the Arkadia to take part in the ISTC European Seminar in Social Science. They will tour London and Northern England before beginning their study at Oriel College, Oxford University.

After the stay at Oxford, the group will go to the continent for 26-day tour including a visit to the Brussels World's Fair and to The Netherlands, West Germany, Switzerland, Italy, and France. The seminar is under the direction of Dr. Leland Sage and Dr. Howard Jones.

BOARD OF DIRECTORS OF THE ALUMNI ASSOCIATION endorsed plans for a Development Program at ISTC at their April meeting. Other business included the allocation of 1958-59 Alumni Scholarships, and approving individuals for the Alumni Service and Achievement Awards. Members of the Board are: (left to right) Milo Lawton, Finn Ericsen, Gladys Horgen, Wendell Bragonier, President, Earl Miller, Caryl Middleton, and Randall Bebb.
ISTC Research Bureau Develops Driver Exam

The development of moral attitudes in regard to highway safety is the objective of the new Iowa Driver’s License examination developed by the research department at Iowa State Teachers College and placed in effect throughout the state April 1.

“Questions have been worded in the new test in such a manner as to encourage drivers to read and become consciously aware of the reasons for Iowa’s driving laws,” according to Herb Silvey, director of research at ISTC. “It is only through an understanding and a moral obligation on the part of drivers that safety on the highway can be guaranteed. No legislative body is able to write a law or design a set of rules to make the highways safe unless the driver himself feels a need for these laws and an obligation to obey them.”

The questions on the test are designed to insure that drivers read and understand the laws of the road. They are worded in such a manner that the test itself aids the driver in becoming aware of the rights and wrongs of motor vehicle operation.

The test includes 80 points of reference to the Iowa Traffic Code; in the same amount of space a multiple choice type of exam would cover 20 such references. License applicants will find 75 per cent of the questions on the test correctly state rules of the road. Twenty-five per cent of the questions present erroneous interpretations of Iowa traffic laws. The person being examined will need to have read the published Iowa Traffic Code study sheet to be able to correctly determine which statements are true and which are false.

Technical questions such as whether a quantity is 2 or 3 or 4 will not be found in the test as the researchers found that this measures a driver’s ability to remember figures rather than his understanding of driving situations.

ALUMNUS—May, 1958

Returns to Japan

Mary McDonald, ’08

Miss Mary McDonald, B.Di. ’08, long time member of the English faculty of Tokyo Woman’s Christian College, returned to Japan late in April to attend the 40th anniversary of the founding of the institution.

Miss McDonald taught three years at Waverly before beginning 30 years of missionary teaching service in 1911. She left Japan in 1941, shortly before the war. During leaves from her teaching position in the Orient, Miss McDonald earned a Master’s Degree at Columbia University.

Friends of Miss McDonald in her home town of Cherokee recently honored her in a “This is Your Life” program.

Of her Japanese acquaintances, Miss McDonald says, “The Japanese people value education highly and although quiet and reserved, they make wonderful and loyal friends.”

The vocabulary has been simplified as much as possible so that the poor reader will not be handicapped in taking the test.

The tests have been given successfully to college and high school groups. Further evaluation of the test will continue as results are tabulated from state-wide usage of the exam. The research department began work on the test in September, 1957, at the request of the Iowa Department of Public Safety.
A New View

Those attending the Alumni Reunion often find the campus greatly changed since their last visit, sometimes as long as 30-40 years ago. This picture, taken last spring may help to acquaint you with the campus as it looks today.

1. Campus Laboratory School. A complete school system offering laboratory experiences to students preparing to teach. Student Teachers work with children from nursery school age through high school. This building was completed in 1957.

2. Arts and Industries. A combination classroom building for all classes in Art and Industrial Arts.

3. Campbell Hall. Erected in 1951, this modern three story women's residence hall houses approximately 300 women students. This is the only dormitory on campus with dining facilities for residents.

4. Sunset Village. Married student housing has been provided temporarily in this quonset village since W.W.II. Returning alumni will be interested in seeing the new permanent apartments for married students recently constructed south of the baseball field.

5. Seerley-Baker Hall. A new wing, combining the Seerley and Baker Halls for men was completed in 1957. In addition to providing additional quarters for men students, the new wing has a central office and lounge and an apartment for the resident director.

6. Lawther Hall. A new wing of Lawther Hall completed in 1948 extends this building west toward the stadium.

7. The Commons. Not new, but important to alumni. This will be the site of the 1958 Alumni Reunion.

Attend the Alumni Reunion June 1
Classes of '98, '08, and '33 to be Honored at Alumni Reunion

We will be looking for you at the Alumni-Faculty reunion, June 1.

The red carpet has been dusted, the weather man, although noncommittal, has been duly notified of the date and requirements for the day, Miss Fitzgerald and her fine staff have promised the usual excellent luncheon. So all that remains is for the Alumni and Faculty to provide the good company necessary for a memorable reunion.

Fred Cram has arranged for a special dinner party for the Class of 1908 on Saturday evening, May 31, in the Commons.

Faculty Makes Recommendations After Month Study of Soviet Educational System

"Democratic schools . . . have unique merits as well as glaring weaknesses, and we have infinitely more to learn from our own mistakes than from a Soviet Union model." That is one of the conclusions reached by a voluntary faculty study group which spent three months studying the challenge of Soviet education and its implications for ISTC.

The seminar also reported that one root of the rising storm of controversy over American schools is fear. "It is fear that the American public school is—too put it plainly—not good enough. Not good enough in the final analysis to produce the top brains and skills, the scientific excellence and the cultural leadership America must produce in the Space Age and the Cold War."

The group emphasized that the challenge to solve the problem of quality in American education is "an old problem, new only in its urgency . . . It is not going to be conquered now with expedients, cheap remedies and crash programs."

Pointing out that one source of the failure to produce the very highest quality of intellectual stimulus is that "educators and school administrators themselves do not always insist—and insist emphatically—that teachers be prepared who are intellectually highly qualified." The group went on to urge that all leaders of the local community must recognize that the greatest challenge they face is that "they as leaders of the school community, learn how to honor intellectual achievement and how to attract and sustain in their classrooms that excellence upon which the democratic future now depends."

The seminar made specific recommendations which were in turn adopted by the total faculty. Among the recommendations was one which urged the formation of a faculty committee to study and recommend actions to be taken by ISTC to strengthen its educational standards.

Other suggestions by the seminar accepted by the faculty as possible areas for committee study were:

1. The use of comprehensive examinations in the various general phases of the undergraduate program and progressively higher standards for admission as a bachelor's degree candidate.

2. Ways of working with the state Department of public instruction and local school authorities and with professional associations in defining the basic subjects and basic content of those subjects for elementary and secondary schools.

3. Raising certification standards for teachers in basic subject areas.

4. Recruiting gifted high school students for the teaching profession.

5. Assessment of the amount of reading and number of term papers now required on the campus, and evaluation of the effects of present grading practices throughout the college.

6. Encouraging intellectual interests and respect for good scholarship among students; the place of foreign languages in the curriculum; the value of "Distinguished Visiting Professors" at ISTC.

7. A re-examination of the present structure of major and minor requirements with a view to providing greater depth in subject matter.

The committee, to be appointed by President J. W. Maucker, will be granted reduced teaching loads in order to provide time for fulfillment of the study. The faculty also recommended that "each faculty
member should reassess the effect of his personal actions and attitudes, and re-examine college policies as they relate to the effective education of teachers. Above all, he should re-examine the quality of his own instruction.”

More specific suggestions by the seminar and accepted by the total faculty included consideration of: establishing an undergraduate honors seminar at the senior level which would bring together the most promising students from all areas; creating a reading list for each classification of student, with passing from one classification to another (e.g., from junior to senior standing) perhaps being contingent upon passing a comprehensive examination over the reading list for the student’s current classification.

Another suggestion was that the college might encourage the study of foreign languages by having some of the books on the senior reading list (see above) in a modern foreign language. Also suggested was the consideration of a major in Russian language and literature at ISTC.

---

**NEWS**

from I.S.T.C.'s 28,000 Alumni

---

**'09**

Mrs. Adrian C. Adams (Carrie McLaury, B.Di. '09) lives at 520 Sixth Ave. E., Kalispell, Montana, about 30 miles from the western entrance of Glacier National Park. She would enjoy a call from any alumnus passing through that scenic country.

**'13**

Nancy Reid, B.Di. '13, retired from teaching after 43 years in the Morning Sun, Iowa and Omaha schools. She lives at Morning Sun.

**'24**

Mrs. Celeste Armstrong Dunkelberg, B.A. '24, 418 Walnut st., Waterloo, is manager of Kelly Girl Service, Inc. in that city. The service provides trained stenographers, typists, bookkeepers, billers, etc. on one day notice. It is designed to provide business with immediate replacements for secretarial service personnel who are ill or on vacation or to help handle extra work during peak work periods in business and industry.

**'39**

Everett Alton, B.A. '39 and M.S. '55 SUI, has been appointed assistant professor in the college of engineering at the State University of Iowa. He joined the SUI faculty in 1955 as an instructor after heading the science department of the Iowa City high school from 1947-54. He and Mrs. Alton have a daughter, Carol, 15.

**'39, '54**

L. Merle Vaughn, B.S. '39, has succeeded Mrs. Guy Wagner (Gladys Redlinger, B.A. '54), as clerk of the Cedar Falls Board of Education and director of business services. Mr. Vaughn was the former superintendent of schools at Calumet. He is temporarily at 920 Washington, Cedar Falls. His family is at Cedar Rapids and will move to Cedar Falls during the summer.

**'44**

Mr. and Mrs. Fred Anderson (Lavonne Eller, B.A. '44) and family live at 46 Orkney Crescent, Toronto 18, Ontario, Canada. They have two children, Paula, 5, and Claudia, 1.

**'49**

Zelda Gillmore and Mrs. Beryl Dillavou Morden, both B.A. '49, received the M.S. degrees in education at Drake University, Jan. 26, 1958. Miss Gillmore lives at 3327 First St., Des Moines, and Mrs. Morden is teaching at Jefferson, 402 S. Wilson Ave.

Iowa State Teachers College
Carl Pesch, B.A. ’50, is research assistant in the office of the Iowa Attorney General. He received the degree of Juris Doctor from the State University of Iowa, Feb. 8, 1958 and was admitted to the Iowa Bar on February 28. He has taught in the schools at Jefferson and Cresco and lives with his wife at 1800 Watrous Ave., Apt. 40A, Des Moines.

Clifford W. Faye, B.A. ’56, received an M.A. degree from Long Beach State College in June, 1957. He teaches in Sierra high school in Whittier, Calif. Mr. and Mrs. Faye (Mary Grace Bunnell, Elem. ’52) live at 630 So. Newlin, Whittier, Calif.

Leslie Graham, B.A. ’49 and M.A. ’57, is a recipient of one of the 50 Shell Merit Fellowships at Stanford University in California for the summer of 1958. The fellowships are established to improve instruction in high school chemistry, physics and mathematics and to recognize teachers in these fields. Mr. Graham and his wife (Donna Hemminger, B.A. ’56) live at 1607 Norris Place, Marshalltown, where he teaches mathematics.

Jerry Janssen, B.A. ’57, has been granted a teaching assistantship in chemistry at the University of Kansas in Lawrence. He is doing graduate work at ISTC and lives at 2231 Merner Ave., Cedar Falls.

Deaths . . .

Former Faculty

Minnie E. Starr, Assistant Professor of music and teaching at ISTC, died Feb. 1st, 1958. Miss Starr taught at the college from 1922 to 1944. Since that time she lived in Royal Oak, Mich.

William D. Taylor, B.Di. ’91, died July 29th, 1957. He taught during a 25 year period in Iowa and also farmed in Iowa before moving to California. He lived in Rivera, California, many years. He is survived by a daughter and two sons.

J. Percival Huget, M.Di. ’92, died March 11, 1958. He held honorary D.D. degrees from Coe and Knox colleges. He taught in the Iowa Schools and later became professor of education at Coe college and an Iowa State education examiner. In 1903 he was ordained into the Congregational ministry. He served as pastor in Cedar Rapids, Galesburg, Ill., Detroit, Mich., and Brooklyn, N. Y. At the time of his death he was pastor of the Classon Avenue Presbyterian congregation in Brooklyn. He is survived by his wife, a son and two daughters.

Quad-City Alumni Meet

Fifty-nine alumni and guests attended the fifth annual dinner of the Quad-City Area Alumni Club March 28.

Dr. J. W. Maucker, president of Iowa State Teachers College spoke to the group about the growth and development of the college and about plans for the future.

During the business meeting 50c dues was collected from each member in attendance. The plan for the collection of dues to cover the cost of preparing annual meeting notices was initiated last year.

Charles Poppenheimer, BA '38, presided over the meeting. Elected to serve as officers for coming year were Marjorie Holderness, B.A. '50, president; Jack Haack, B.A. '50, vice-president; and Mary Jane (Brindley) Easter, B.A. '39 secretary-treasurer.

The Alumnus
