This Report is brought to you for free and open access by the Rod Library at UNI ScholarWorks. It has been accepted for inclusion in Rod Library Documents by an authorized administrator of UNI ScholarWorks. For more information, please contact scholarworks@uni.edu.
UNI ScholarWorks, UNI's institutional repository, approaches 3 million global downloads! Our repository showcases the knowledge, creativity and innovative spirit of UNI. UNI ScholarWorks demonstrates the reach and impact of campus departments and programs on a global platform. Works by UNI authors are being used to help solve global society issues and problems. The repository contains over 34,900 works and receives 1 million downloads per year. The system-generated metrics provide information about the reach of individual works. In addition, we receive feedback from people from all over the world about how specific works have impacted and helped them.

- A student says, "I'm a graduate student from the University of Dhaka, Bangladesh. I am doing my thesis titled "Exploring the nature of intersectionality and its impact on education. I searched a lot but didn't get any quality resources on this topic. But finally, I found this work of Petersen which provides me a guideline to continue my work. I am really thankful to the authority for this open access to this tremendous work. Thanks a lot." This dissertation, Exploring Intersectionality in Education: The Intersection of Gender, Race, Disability, and Class, was written by a student in the Department of Special Education and has been downloaded 8,604 times since posting in 2017.

- An Australian researcher says, “I am an agricultural researcher based in Australia who is interested in early studies of cereal physiology, in this case oats. Often the early works establish important foundations for current understanding of cereal biology but, dating to a pre-digital era, these can be hard to access. Being able to easily access such seminal research from your institution is a wonderful thing. Many thanks.” This journal article, "Photoperiodism in Oats," (1965) is located in the Proceedings of the Academy of Science. The article has been downloaded 124 times since posting in 2018.
An article, "Factors Affecting Economic Growth in Developing Countries," out of an undergraduate research journal Major Themes in Economics, by a student in the Department of Economics is one of the most downloaded works located in the repository with over 40,000 downloads since posting in 2018.

A wide variety of content is found in UNI ScholarWorks, ranging from journals to conferences to image galleries to books developed through course assignments to undergraduate honors program theses to graduate theses and dissertations.

The repository contains the important Iowa publication, Journal of the Iowa Academy of Sciences | Proceedings of the Iowa Academy of Science (1887 to 2015) with 267,000 downloads. We have two journals containing undergraduate student research, Major Themes in Economics with over 86,324 downloads (Department of Economics) and the Proceedings of the Jepson Undergraduate Conference on International Economics (Department of Economics.) Conferences include Research in the Capitol (Honors Program), Annual Graduate Student Symposium (award winners are indicated), and Bill & Linda Tubs Teaching Connects. Image galleries include the Frank Lloyd Wright Structure Image Gallery, Malcolm Price Laboratory School Photographs, and Palczewski Suffrage Postcard Archive. UNI related publications include the Yearbooks, Catalogs, Commencement Programs, and Schedule of Classes. In addition there are Open Access Books and OER (Open Educational Resources) collections and so much more!

The functionality of UNI ScholarWorks ties directly to the strategic goals of UNI by illustrating student success. It is one of the few things that clearly demonstrates the value and global reach of all parts of the university. The structure of UNI is found within the repository; therefore, each college and department include relevant works collected to it and displays a global readership map. Alerts with links to download numbers and the global readership map can be set up for campus administrators. Authors receive regular reports and links to the readership map for their works.

Together, our entire university community is creating an important resource for the global community. We look forward to working with you on developing future projects.

If you have questions about UNI ScholarWorks, please contact your library liaison or Ellen Neuhaus, Digital Scholarship Librarian at ellen.neuhaus@uni.edu or (319) 273-3739.
