List of Figures and Tables

Figure 1: Distribution of Respondents by College	1
Table 1: Demographic Characteristics by College	2

Section I

Introduction

This report presents a summary of the University of Northern Iowa (UNI) Summer School Survey given to students participating in advanced registration for summer school on March 9-11, 2005. The questions on the Summer School Survey were designed to help gain a better understanding of the patterns of usage of summer school courses and student's preferences for scheduling. The survey was completed by 2,558 students. On average, 492 students answered each question (see Figure 1 for the distribution of respondents by college).

Method

All students participating in electronic registration for Summer 2005 were presented with two paired questions randomly selected from a list of ten items prior to advancing to the registration screen during the summer registration process. Respondents were asked to answer questions regarding their preferences for summer school sessions at UNI. They were asked to indicate the extent to which they agreed or disagreed to most of the survey statements on a Likert scale ranging from 1 (strongly disagree) to 5 (strongly agree). Some of the items required the student to indicate a "yes" or "no" response, while others required a specific date or time selection.

Table 1 presents demographic information for student respondents to the UNI Summer School Survey. For the purposes of this study, demographic information consists of sex, race, grade classification, residency status, and age. We were unable to obtain demographic information for some respondents. This missing data is reflected in the decreased total N for each category. Throughout this report, most percentages were rounded to the nearest one tenth of a percent. Therefore, due to this rounding, the values in some of the tables may not equal precisely 100 percent.

Results

The subsequent summary tables and charts of responses to the survey questions show the number and the percent responding to each question broken down by college. College designation for some respondents was unavailable; therefore, some percentages reflect this missing data. A summary of data from 2001 to 2005 is also presented. The following list presents some of the key observations of the survey. Certain patterns of response may indicate a need for future examination of these relationships in the university environment. Please note that agreement is presented in terms of individuals who responded either “agree” or “strongly agree” to the survey items.

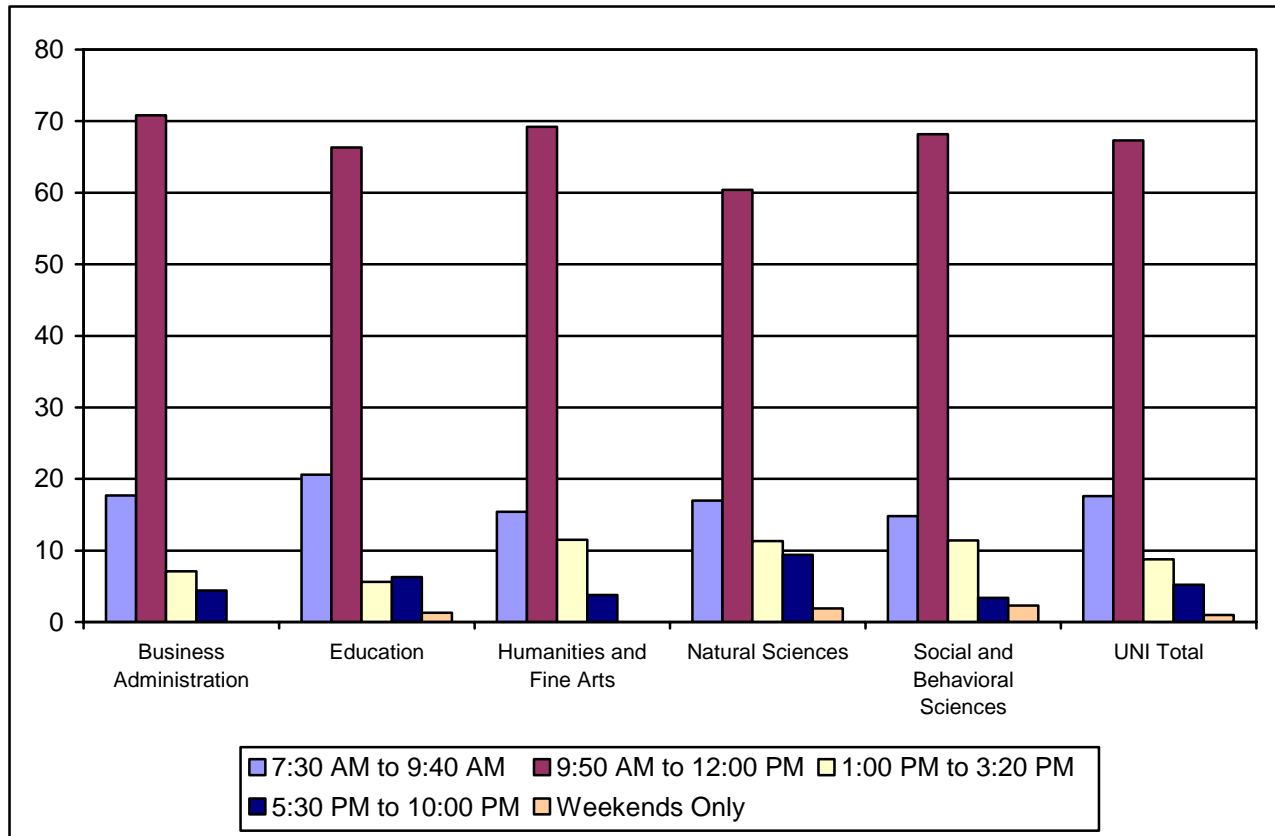

- A large number of students (66.9%) indicated that they prefer summer school courses to be offered between 9:50 AM and 12:00 PM. The majority of the respondents (84.6%) indicated that they prefer to attend summer school classes before noon.
- Just over three-fourths of all respondents (75.9%) indicated that they prefer to take summer school courses during the month of May, while 22.0% prefer June, and only 2.1% prefer to take courses in July.
- The majority of respondents (76.3%) stated that their primary reason for enrolling in a summer session course was to stay on schedule.
- Almost three-fourths of respondents (73.2%) indicated that they prefer to have summer school courses offered in 4-week sessions.
- 45.0% of respondents indicated that financial aid was an important part of their decision to enroll in summer school (14.3% agree and 30.7% strongly agree to this statement).

- Respondents indicated that local employment was somewhat important in their decision to enroll in summer school (49.7%).
- 45.2% of respondents agreed that the courses available in summer school this year met their needs, and 40.3% agreed that the time at which summer school courses are offered this summer met their needs.
- Now that a May session is offered during the summer, 71.4% of respondents have found this session useful (53.3% of respondents found this session very useful and 18.1% of respondents found this session useful).

Summary of Responses

Q1. I prefer summer school courses offered (time of day):
