## TEXTBOOKS ON GENERAL SCIENCE

Many requests have come to us for information concerning elementary and high school science textbooks. The kind most often mentioned have been those on general science. We are therefore printing below a list of such books,

with a brief statement of content in each case. Further information may be obtained from the publishers.

### 1. The World About Us

Twenty-nine chapters—each introduced by a paragraph covering by pertinent questions or statements the general subject of the chapter, and ended by a brief summary. The experimental method extensively used throughout.

### 2. Introduction to Science

Fifteen units covered in thirty-five chapters. Teaching devices include projects, experiments, special reports, puzzles, games and tests. Three-level assignments for superior, average and slow pupils. Key and teacher's manual to accompany the text.
