Duracell-NSTA Scholarship Competition

Students wishing to compete for $30,000 in scholarships may enter the 1993 Duracell NSTA Scholarship Competition. Sponsored by Duracell U.S.A. and administered by the National Science Teachers Association, the competition offers students in grades nine through twelve an opportunity to win up to $10,000 in college scholarships.

To enter the competition, each student must design and build a working device powered by Duracell batteries. To qualify, each entry must include a descriptive two-page essay, wiring diagram and photos of the device accompanied by a completed official entry form. The actual device should not be sent with the initial entry.

First prize in this competition is a $10,000 college scholarship. In addition, the five second place awards have been increased to $5000 scholarships this year.

For more information or to obtain official entry forms, contact the Duracell/NSTA Scholarship Competition, National Science Teachers Association, 1742 Connecticut Ave. NW, Washington, DC 20009. Entries must be received by January 21, 1994.
