Science Notes Policy

Many science teaching materials are made available at no or low cost. A description of materials which are available free or for the cost of shipping may be included in a *Science Note* after they have been seen by one of the editors and are considered to be of educational value. Not all materials are appropriate for class distribution and appropriate use must be determined by teachers. Before items are included in *Science Notes*, distributors have been contacted to determine that items are available. Publishers are encouraged to submit copies of books which may be considered for book reviews to be included in *Science Notes*.
