People for Ecological Awareness and Conservation Ethics (P.E.A.C.E.) has made its bi-monthly newsletter, *The P.E.A.C.E. Connection* available to anyone "concerned with our environmental quality of life."

The newsletter is sent without charge to all members of P.E.A.C.E. The organization has no monthly or annual dues, but a donation to cover printing and postage costs is appreciated. The goals of P.E.A.C.E. include providing accurate information needed to make informed, intelligent decisions about the health of the environment; helping people realize that they are now in control of their environmental quality of life; covering issues about global environmental events affecting everyday life; increasing awareness of how lifestyles affect natural ecosystems; encouraging people to think about environmental issues, form opinions and act on them; and inspiring people to understand more about the natural world and humankind's delicate relationship with the environment.

*The P.E.A.C.E. Connection* covers in-depth information on a variety of topics (each issue focusing on one topic) as well as informing its readers of ways to become involved in environmental issues, spotlighting people working to improve our quality of life and providing an open forum for opinions, questions and ideas.

If you would like to join P.E.A.C.E. and receive *The P.E.A.C.E. Connection*, contact Kimberly Brooke Mitchell, P.E.A.C.E., 19930 Leo Hansen Road, Florence, MT 59833.

Drexel University in Philadelphia, Pennsylvania, has recently announced the release of *TIES (Technology, Innovation and Entrepreneurship for Students)*. *TIES* is a cooperative, non-profit publication for teachers interested in helping students increase their technological literacy and capability.

Drawing upon information from industry, business, government and education, *TIES* provides teachers with up-to-date resources for the development of hands-on, problem-solving technology education curriculum.

*TIES* promotes the potential for innovation and entrepreneurship in students by providing models, strategies and examples of design, critical thinking, creativity and problem-solving and through spotlighting professional and student designers and their products.

To obtain a free sample copy of *TIES*, contact Scott Anderson, Project Director, *TIES*, Drexel University, Philadelphia, PA 19104.
