Available at: <https://scholarworks.uni.edu/istj/vol23/iss3/19>

This Article is brought to you for free and open access by the IAS Journals & Newsletters at UNI ScholarWorks. It has been accepted for inclusion in Iowa Science Teachers Journal by an authorized editor of UNI ScholarWorks. For more information, please contact scholarworks@uni.edu.

Offensive Materials Statement: Materials located in UNI ScholarWorks come from a broad range of sources and time periods. Some of these materials may contain offensive stereotypes, ideas, visuals, or language.

Fact Sheet Available from HEATH Resource Center

A fact sheet entitled "Access to the Science and Engineering Laboratory and Classroom" has been made available by HEATH Resource Center.

HEATH is an acronym for Higher Education And The Handicapped. The Resource Center operates the National Clearinghouse on Post-secondary Education for Handicapped Individuals and serves as an information exchange regarding educational support services, policies, procedures, adaptations and opportunities for handicapped students in American colleges, vocational-technical schools, adult education programs and other post-secondary training programs.

The fact sheet is available free of charge and includes sections directed towards the student, the instructor and the administrator as well as listing of disability accommodations and distributors and manufacturers of various aids.

To obtain a copy of the fact sheet, write to HEATH Resource Center, One Dupont Circle, NW, Suite 670, Washington, DC 20036-1193, or phone 800-54-HEATH (800-544-3284).

Chemistry Project Booklet Available

An informative booklet entitled "A Chemistry Project from Start to Finish" has been made available by the American Chemical Society. Designed to aid teachers in assigning student projects, the booklet allows students to choose topics that interest them and to plan projects that fulfill their own personal goals.

Besides suggesting formats for carrying out projects, the booklet explains how to decide what to do and the best course of action in pursuing a topic. It also gives several ideas for references that would be helpful to students, including magazines (such as *Discover* and *Science News*), teachers and area experts.

For students interested in doing written reports, the booklet provides a basic structural outline including title, abstract and main section. It also recommends plans for written and experimental reports, oral reports and exhibitions.

Single copies of the booklet are free, and multiple copies are 50 cents each. They may be obtained by writing to the Career Services Educational Division, American Chemical Society, 1155 Sixteenth Street, N.W., Washington, DC 20036.
