The Way It Is With Man Made Fibers (27 min., color) Fibers and Textiles.

The Wonderful World of Nylon (13 min., color) A 25 year history of

New Audubon Society School

The National Audubon Society has established a special environmental education program which can serve as an accredited portion of any college, high school or graduate school student's curriculum. The program provides potent learning experiences by making it possible for participating students to live in and study varying natural communities and cultural settings. Audubon semesters and summers explore the ecology of America with the assistance of over 100 experts, specialists and resource people.

Full information is available by writing the Audubon Expedition Institute at 950 3rd Ave. NY, NY 10022. Admission is open to all regardless of race, creed or nationality. The Institute is partially funded by a grant from the National Endowment for the Humanities.
