This Article is brought to you for free and open access by the IAS Journals & Newsletters at UNI ScholarWorks. It has been accepted for inclusion in Iowa Science Teachers Journal by an authorized editor of UNI ScholarWorks. For more information, please contact scholarworks@uni.edu.

Offensive Materials Statement: Materials located in UNI ScholarWorks come from a broad range of sources and time periods. Some of these materials may contain offensive stereotypes, ideas, visuals, or language.

intellectual skills that are basic to critical thinking, problem-solving, and decision-making.

Education is responsible for increasing student awareness, and comprehension of his/her environment. As that environment becomes more scientific and technological, education must develop methods for increasing cognizance of science and technology. (10) Science instruction must become so personally applicable to students, as members of a technological society, that they should demand more.
