This Article is brought to you for free and open access by the IAS Journals & Newsletters at UNI ScholarWorks. It has been accepted for inclusion in Iowa Science Teachers Journal by an authorized editor of UNI ScholarWorks. For more information, please contact scholarworks@uni.edu.

Offensive Materials Statement: Materials located in UNI ScholarWorks come from a broad range of sources and time periods. Some of these materials may contain offensive stereotypes, ideas, visuals, or language.

- j. Allow the mixture to cool for a few minutes. During this time, using the clamp as a handle, quickly clean the flask using a brush and hot water. Put away the flask and clamp.
- k. Return to your samples and grease your hands slightly. Roll each sample separately in your hands until each looks like a long worm. Twist them together and then bend into the shape of a fish hook.
- l. Allow your product to cool for several minutes. During this time, wash and return your test tubes. Put away the remaining apparatus.
- m. Analyze the result, and see how it compares with the commercial product of the same species.
