Wanted Names of Outstanding Science Teachers In Iowa

The Board of Directors of the Iowa Academy of Science has approved the recommendation of the Recognition and Awards Committee to expand the Excellence in Science Teaching Awards Program. This action was taken in response to interest from science teachers and school administrators and to vigorous support from the Science Teaching Section of the Academy.

Awards will now recognize the outstanding elementary and junior high science teachers in addition to distinguished secondary science teachers. First awards in these new categories will be made at the 1976 Annual Meeting of the Iowa Academy of Science. If you would like to nominate someone for any of the award categories, send your request for nomination forms to:

Excellence in Science Teaching Awards
Mr. David McCalley
Department of Biology
University of Northern Iowa
Cedar Falls, Iowa 50613

The Bicentennial

The Bicentennial will be celebrated in Iowa classrooms in many ways. By looking back on past scientific achievements, students may be better able to understand and appreciate the present and predict the future. If you are observing the Bicentennial in your science classes, write to Editor, ISTJ, Biology Department, University of Northern Iowa, Cedar Falls, Iowa 50613 and space will be devoted in the journal as to how the Bicentennial is being observed in science classes throughout the state. The journal is also interested in any written memorabilia concerning science teaching in the past.
