ARMY JUNIOR SCIENCE, ENGINEERING AND HUMANITIES SYMPOSIUM

Do a research project, explore it, put time, hard work, and study into it and numerous rewards come about. Especially for six Iowa students selected to go to the National Junior Science and Humanities Symposium held at West Point Academy, New York, May 9-12, 1973. These six students boarded flights into New York where they accompanied students from 31 other regions.

An interesting part of the Symposium was meeting and exchanging thoughts and ideas with other students.

The top student presenter from each region reported on their projects in National competition to determine who would be selected to enter International competition in London, England. Projects were of every type and interest to the attending students.

Students participated in several group discussions concerning the "Changing Earth" throughout their stay at West Point.

Tours of the Academy were provided, with students observing the cadet's disciplined and orderly life. A trait of the cadets which stood out was their respect for others. These traits were observed over the entire Academy in several different cadet class tours and when the cadets performed a very impressive close order drill.

The stay concluded with tours of the UN Building and other tourist attractions in New York City.
