Information for Authors

Papers considered for publication in the *Proceedings of the Iowa Academy of Science* shall be the results of original investigation. They will be judged on the basis of their contribution of original data and ideas or interpretation. Papers from non-members will be accepted only upon the vote of the Editorial Committee.

Articles submitted should be clear and concise. Close attention should be given to accuracy in spelling, grammar, and the use of standard abbreviations. Paragraphing, headings, figures, and tables should be in conformity with the instructions given below. Manuscripts are to be typed on good quality bond paper, 8½ by 11 inches, on one side only. Mimeographed or duplicated material is not acceptable. All copy should be double-spaced and have wide margins. An exact copy of the manuscript should be kept by the author, since the copy submitted will not be returned with the galley proof. The sequence of material as submitted should be: title page, abstract, the manuscript proper, references, tables, figure legends, and figures. These pages should be numbered consecutively in the upper righthand corner. Fasten with paper clips; do not staple.

The **TITLE PAGE** should include the title, author's name, the laboratory or institution of origin, complete address for mailing proofs, and a running head of not more than thirty-five letters and spaces. It is recommended that titles be short, preferably not more than seventy characters. Abstracting and bibliographic services request that titles be concise and specific, and we feel that the *Proceedings* should cooperate.

The **ABSTRACT** should be informative, concise, and complete in itself without reference to the body of the paper. It should be suitable for the abstracting journals without rewording. Give what was done, what was found, and what was concluded in not more than two hundred words.

The **HEADINGS** for the main subdivisions should be centered and typed in capitals. Second-order headings should be typed flush to the left margin with major words beginning with capitals and should be underlined. When three types of headings are required, the third-order headings are typed with paragraph indentation, have only the initial letter of the first word capitalized, and are underlined. They end with a period, and the text follows on the same line.

FOOTNOTES should be used sparingly. Those that are neces-

white drawing paper or blue tracing cloth. Keep in mind the dimensions of the page (4 by 7 inches), making allowance for the figure legend. It is suggested that the author make a rough sketch of the content of his figure and then design it to fit the page. A good size for the drawing is twice that desired for the printed figure, with all lettering and line thicknesses similarly enlarged. All drawings which are to be reduced to a given size should be drawn and lettered to the same scale.

Photographic copies of drawings are preferable to originals. In no event should drawings or photographs submitted be larger than 8 by 14 inches. When larger original drawings are necessary to secure accuracy, the author should have them photographed. All PHOTOGRAPHS should be sharp, contrasty, and have a glossy finish.

Chemical structural formulas and process flow diagrams should be kept to a minimum and should be drawn for reproduction as line cuts.

When it is desirable to indicate magnification in photo-micrographs or drawings, the scale in microns (or other suitable units) should be drawn directly upon the figure. Otherwise, the actual magnification should be given, so that corrections can be made for reduction.

ALL LETTERING should be in India ink and meticulously prepared. It should be sufficiently large that it will be at least 1 mm. high on reduction. Freehand lettering is unacceptable, and for reproduction as cuts ordinary typewriter script can not be used.

GALLEY PROOFS will be sent to the author, usually in July, August, or September. These should be read carefully and returned promptly to the editor. Alterations should be limited to typographic and factual errors. Engraver's proofs and page proofs will be sent only upon request.

Articles for Volume 69, 1962, should be submitted to the following section chairmen:

BOTANY: J. L. Carter, Simpson College, Indianola, Iowa

CHEMISTRY, Inorganic and Physical: O. N. Carlson, Iowa State University, Ames, Iowa

CHEMISTRY, Organic and Biological: Glen A. Russell, Iowa State University, Ames, Iowa

CONSERVATION: A. O. Haugen, Iowa State University, Ames, Iowa.
