(1970) "Careers in Science and Technology," *Iowa Science Teachers Journal*: Vol. 8: No. 2, Article 3.
Available at: <https://scholarworks.uni.edu/istj/vol8/iss2/3>

This Article is brought to you for free and open access by the IAS Journals & Newsletters at UNI ScholarWorks. It has been accepted for inclusion in Iowa Science Teachers Journal by an authorized editor of UNI ScholarWorks. For more information, please contact scholarworks@uni.edu.

Offensive Materials Statement: Materials located in UNI ScholarWorks come from a broad range of sources and time periods. Some of these materials may contain offensive stereotypes, ideas, visuals, or language.

have a subscription to *Environment*, and if so do you read it? Have you thoughtfully read any scientific publications concerning these issues? Are you aware that all of these problems are multi-faceted and that a "scientific solution" in the classic sense of the word will not be possible. Have you read *Come, Let Us Play God*? This book, more than any other that I have read, focuses on the multi-faceted aspects of problems and solutions that are science related.

The success of the classroom teacher in meeting the needs for integrating science into the society and bringing society into his science classrooms will largely be determined by how active the classroom teacher is in educating *himself* on a day-to-day basis.

Careers in Science and Technology

Readers will find information about more than 30 career fields of interest to students in a 48-page bibliography of career guidance literature just released by the National Science Teachers Association. The NSTA has compiled this 1970 edition of *Keys to Careers in Science and Technology* to inform students, guidance counselors, teachers, and parents about current publications that are useful and reasonably inexpensive.

In reporting on career guidance materials, *Keys to Careers* gives the name of the author or issuing agency, a brief statement as to the contents of the publication, and other data, such as price and date, as available. In addition, the reader will find here information on: scholarships, summer

programs for students, award programs for students, special programs for students, the field trip as a source of career information and stimulation, and agencies which can help in career guidance. The importance of the teacher's role in guidance is indicated by the numerous awards, scholarships, fellowships, and other programs which this bibliography also lists as available to teachers.

Keys to Careers in Science and Technology may be ordered from NEA Publication Sales, 1201 16th Street, N.W., Washington, D.C. 20036. The price is \$1, with a discount of 10 per cent on orders of 2 to 9 copies, 20 per cent on orders of 10 or more. Payment must accompany all orders except those on official purchase order forms. Postage and handling charges will be added to billed orders.
