Board of Directors Meet
4. Dichaete  This is also a dominant trait, lethal in the homozygote. The heterozygote’s wings are held to the side.

In this experiment it shall be assumed that the students are using the kinky mutant.

About two weeks before the students are to begin the experiment, make a cross between the Kinky and Wild fly to obtain the heterozygote which is to be used. About two stock bottles should suffice for the average class. Place ten to twelve pairs of flies in each bottle, using Kinky males and wild virgin females.

In determining the number of flies to put into the population cage 5 pairs per food vial is considered best. However not having this many flies, the number of flies per food vial could be cut down, less food vials could be used, or a smaller population cage could be used.

Representative to UMREL

President Chellewold has appointed Dr. Robert Yager to continue as the representative of the Academy on the Iowa Council for the Upper Midwest Regional Educational Laboratory. Dr. Yager represented the Academy last year as this new regional agency began its operation. The headquarters for UMREL is in St. Paul. The states involved are Iowa, Minnesota, Wisconsin, North Dakota, and South Dakota. Several Academy programs may appear in proposals for possible funding through UMREL.

Board of Directors Meet

The fall meeting of the Academy’s Board of Directors occurred on November 5 in Iowa City. The minutes of this meeting are to be circulated to the entire membership at a later time.

These 12-year olds learned to count atoms with the "ATOMETTE" SCIENCE LAB

Six graders and up can now easily be taught all about the behavior of the atom with the exciting new "ATOMETTE" LAB. The "ATOMETTE" is a complete science teaching system ... consisting of specially simplified, 100% SAFE equipment plus both a Teacher’s and Student’s Manual. It consists of a rugged, student-proof Ratemeter (or Atom Counter) with a special, easy-to-read scale: Calibrated Equipment Board; Radioactive Source; four different kinds of Absorbers for radiation absorption experiments; plus the two manuals.

Here is a stimulating, new "classroom tested" way to introduce pre-high school, junior high school, and even high school students to the wonders of the atom and atomic energy. If your students can count numbers, they can count atoms with the "ATOMETTE" SCIENCE LAB. Only $135.

Send for descriptive literature.
