This Article is brought to you for free and open access by the IAS Journals & Newsletters at UNI ScholarWorks. It has been accepted for inclusion in Iowa Science Teachers Journal by an authorized editor of UNI ScholarWorks. For more information, please contact scholarworks@uni.edu.

Offensive Materials Statement: Materials located in UNI ScholarWorks come from a broad range of sources and time periods. Some of these materials may contain offensive stereotypes, ideas, visuals, or language.

Meet your photo editor . . .

GEORGE MAGRANE—family man, teacher, and photographer, has contributed a great deal to the **JOURNAL** in the past year. He supplied cover shots, and a number of other pictures that have been used.

George is a man of convictions. 'I believe in extra-curricular activities after

academics as beneficial to healthy student growth,' says George, who is head track coach at Ottumwa High. Though he also helps with football, Coach Magrane stands for solid study in the classroom. Students in biology get unique opportunity to work in the school greenhouse, and in the newly-designed laboratory for the study of

microbiology and protozoa.

As a family man, George, his wife Janice, two daughters and son enjoy camping. The picture of the Magrane family was taken on the south rim of the Grand Canyon by 9-year old Lisa.

This is what we like to see . . .

Science Congress here to draw 600

Too bad we went to press just as Vern Gunderson of Mason City was putting out his final publicity on the North Central Science Congress. We would like to have had pictures of the fine affair. We'll have them for the April issue.

Vern has done a most amazing job as a Regional Director of ISTA. His long hours of planning will pay off as these who attend the Science Congress take home the scores of new ideas and reports from the living edge of science.

Other Regional Directors have been busy too. George Chapman held an exciting Northeast Regional Conference in November. More about that is described on p. 69.
