FILMSTRIPS FOR EARTH SCIENCE AND CONSERVATION

All frames in color . . . Six filmstrips in each set . . .
Teacher's Manual with each set

From the Earth Science Series

From the Conservation Series

All of the resources of Ward's Geology Division have gone into the production of these fine filmstrips. Photographs of field situations are combined with art work to illustrate important concepts, achieving clarity, accuracy, and simplicity without a mass of confusing detail. Use of these filmstrips produces positive values in student interest and comprehension.

Six sets comprise the series:

MATERIALS OF THE EARTH'S CRUST

The minerals and rocks—their structure and identification.

71 W 2000 40.00

GEOMORPHOLOGY

The origin and development of land forms.

71 W 2100 40.00

WEATHER AND CLIMATE

The forces that determine weather and climate around the world.

71 W 2200 40.00

AN INTRODUCTION TO FOSSILS

The life of the past, and what has been learned from its study.

71 W 2300 40.00

USING NATURAL RESOURCES

Water, soils, minerals, and fuels—their wise use for today.

71 W 2400 40.00

RESOURCES FOR TOMORROW

Conserving our resources and natural wonders for the future.

71 W 2500 40.00

To sum up: Six filmstrips per set + All frames are in color +
Over 300 frames per set + Teacher's Manual with each set
