crease in the value of the laboratory to the student.

BSCS is not an endpoint—not a cure-all. It is a radical revision, a beginning, a stimulus aimed at enriching biological education at all levels.

CONSTRUCTING MODELS OF ORGANIC MOLECULES to visualize the chemistry taking place in cells are these four high school students at The State University of Iowa. Pictured are (seated) Diane Looney, Solon; (standing, from left) Hollis Hunter, Coggon; John Eckstein, Iowa City; and Jeff Powell, Elkader. The 8-week institute for high ability high school students was sponsored by the National Science Foundation in the summer of 1964.
