Science Teachers' Calendar

Mr. Paul Tweeten, Science Consultant for the Iowa State Department of Public Instruction, provided the science teaching community with a most useful calendar for 1965-66 science education in Iowa. All science teachers should have this calendar in a prominent spot on their bulletin boards. Thanks, Mr. Tweeten, for preparing such a worthwhile and usable listing!

If we print jokes—
people say we are silly.

If we don't—
they say we are too serious.

If we don't print contributions—
we don't appreciate genius.

If we do print them—
the journal is full of junk.

If we edit the other fellow's stuff—
we are too critical.

If we don't—
we're asleep.

If we print some slang—
we are showing bad taste.

If we use technical material—
we are too highfalutin.

If we clip things from other journals—
we are too lazy to write them ourselves.

Now, like as not, some will say we copied this from someone else.

WE DID!
