THE COVER

The microscope is a tool that can be used in chemistry, metallurgy, and numerous industrial processes in addition to its more common use in biological science studies.

This unusual photomicrograph of conjugating Suctoria was taken by George Magrane, an Ottumwa High School teacher. Mr. Magrane is the Photographic Editor of the *JOURNAL*.

The *JOURNAL* welcomes any photographs from science teachers in Iowa, and would be most happy to print pictures of students at work, unusual classroom settings, field trips, and other interesting science activities. You may send your pictures to Mr. Magrane at the Ottumwa High School.
