(1964) "News and Notes - Advertising for This Journal," *Iowa Science Teachers Journal*: Vol. 2 : No. 2 , Article 20.

Available at: <https://scholarworks.uni.edu/istj/vol2/iss2/20>

This Article is brought to you for free and open access by the Iowa Academy of Science at UNI ScholarWorks. It has been accepted for inclusion in Iowa Science Teachers Journal by an authorized editor of UNI ScholarWorks. For more information, please contact scholarworks@uni.edu.

this section, please feel responsible! It is up to you to submit ideas for this section of your Journal. When one attempts to be a reporter for all science teaching news in the state, one soon discovers that it is an impossible job. Help is needed!

Regional NSTA Meeting

Dean Stroud of Des Moines is to be congratulated for his fine work in organizing and administering the October 2-3 Regional NSTA meeting held in Des Moines. The program proved exceptional. Many ISTA members were a part of the program. Many others received the benefits of attendance.

Let's hope that it will not take another fifty years before we can host another regional meeting in Iowa!

Advertising for This Journal

We are looking forward to expansion of membership and size of this Journal. This is possible with your help in enlisting the help of more advertisers.

Sister Mary Martina of Dowling High in Des Moines has recently assumed the advertising editorship as her work as ISTA secretary. She has arranged for the additional advertisement in this issue and has completed arrangements for significant increases in future issues of Volume 2.

If you will contact persons in your area who might place advertising orders, Sister Martina will follow through with an official contact. This is one positive way that every member can do his share of the work of the Association.

Sister Martina is to be congratulated upon the vigor with which she has embarked on this new position!

New Members

If you have not renewed your ISTA membership it is now due. Thirty new members were accepted at the October 16 meeting in Des Moines. We are anxious to grow even more during our 1964-65 year.

Lyle Anderson, our retiring president, has accepted the important job of membership chairman. He has already begun an extensive campaign to double our membership. All old and new members are hereby requested to assist. Have you secured two new ISTA members during the last month?

Contact Lyle Anderson, West High, Waterloo, for information concerning membership. Lyle will also be glad to take care of your five dollar dues. He will see that your name is added to the 1964-65 "Actives". Act today!

Ford-FSAA Program

This is the youth activities program of

the National Science Teachers Association. Specific information is available from NSTA Headquarters, 1201 Sixteenth Street, N.W., Washington, D. C. The Ford-FSAA program is one of the few national youth science programs which was requested, designed, and conducted by science teachers. Its function is to help the teacher develop extra-class activities which extend the day-to-day classwork by providing students with opportunities to pursue their individual interests. Any secondary school science club in the United States may receive a charter as a chapter of FSA.

A Sponsor's Guidebook, a quarterly newsletter, suggestions for projects, and membership materials including membership lists, individual card, pins and insignia are available. The Ford Motor Company is the chief sponsor. However, other awards are provided by various organizations and industries.

The Ford-FSAA program is one which has been in keeping with modern philosophy of science education from the beginning. Several other programs now emphasize real research and preparation of a manuscript rather than the 'show and tell' idea which has characterized the Science Fair movement. However, this evolution has resulted from these pioneer efforts of NSTA and some of their special boards and committees.

Junior Academy Symposium

The Iowa Academy of Science selected eighty-five talented secondary school students to participate in the first Symposium to be conducted with funds from the National Science Foundation. These students were selected on the basis of their past records in science courses in their schools. Scientist-advisors who are members of the Senior Academy are working with each of the participants.

A final prospectus has been prepared for each research problem. It is anticipated that each participant to prepare a preliminary report of the work by April 1. Sixty of these participants will be selected as finalists. Their expenses will be paid for a two day meeting of the Junior Academy at the University of Dubuque on April 23 & 24. Here they will present their papers before the membership. These reports will later be printed as a special volume of the **Proceedings of the Junior Academy**.
