A REPETITION OF THE EXPERIMENT ON TEACHING THE VERNIER

C. J. LAPP

A year ago a report was made on an experiment in teaching the vernier. The findings were so unexpected that the experiment was repeated in September, 1936, with almost the same results.

A STUDY IN LEARNING ELECTRODYNAMICS BY MOTION PICTURES

C. J. LAPP

The experimental sound picture on electrodynamics has recently been released. The principles illustrated were inventoried before and after the picture was shown. A study was made on the ability of students to transfer the principles to a new situation. Two sections were studied, one using the picture alone and the other using the picture with study aids. The findings are studied statistically.
